Frontend Developer

React Developer with 3.5 years of experience in JavaScript, React.js, and Node.js. Skilled in building responsive SPAs and dynamic UIs, proficient in microfrontend architecture, & agile methodologies. Committed to quality web solutions and team success as a Frontend Developer.

Work Experience

Accenture Solutions Pvt. Ltd. | Packaged App Development Analyst Dec'21 - Feb'-25

Project 1. Chubb Marketplace Platform

- **Developed** and maintained user-friendly & **responsive** UIs for insurance applications using **React.js** & TypeScript.
- Designed a policy management module that enabled users to view and update their insurance policies efficiently.
- Created an interactive quote generation tool that dynamically adjusts premium calculations based on user inputs, contributing to a 5% increase in quote generation speed.
- Implemented **code splitting** and **lazy loading** to enhance application performance.

Project 2. E-Commerce Storefront

- **Developed** and delivered user interfaces using **React.js** for product search, Invoice & Card details, & Inventory.
- Implemented **microfrontend architecture** to improve modularity and scalability.
- Collaborated with UX designers and backend developers within **Agile** frameworks to translate requirements and align with client specifications.
- Wrote UI unit test cases using Jest to ensure code quality and reduce production bugs.

KPMG India | Associate Consultant

March 25 - Till Date

Project 1. UPYOG MSeva Project: *A Modular government initiative for delivering digital governance solutions.*

- Developed highly scalable web applications that enhanced municipal service delivery.
- Created dynamic and responsive front-end modules using React.js, Config Driven UI, and Tailwind CSS.
- Engineered reusable UI components following modern UI/UX principles for consistency across government modules.
- Optimized performance using lazy loading and modular coding to reduce load times and boost user experience.
- Collaborated cross-functionally and applied Agile methodologies for seamless API and backend integration and timely, quality deliverables.

Technical Skills

JavaScript | **React JS** | Redux | Axios | **React-Router** | Yarn | Express.js | Tailwind | Git | HTML5 | CSS3 | **Bootstrap** | Sass | RESTful APIs

Technical Projects

React Job Search App

Feb'24

- An efficient online job portal connecting employers and job seekers, enabling employers to provide resources and job seekers to apply for targeted opportunities
- Built entirely with React.js, with routing and JSON.

Crypto Price Tracker Application

May'24

- An application that allows users to monitor real-time prices of various digital assets and visualize historical performance. It automatically updates crypto price data without manual refreshes or external plugins.
- **Tech stack:** React.js, React-Router, Context API, and CoinGecko API.
