PROFESSIONAL OVERVIEW

Results-driven Project Management Officer (PMO) and Software Developer with 4+ years of experience in full project lifecycle management, software development, and IT operations. Expertise in Agile, Scrum, and Waterfall methodologies, risk assessment, stakeholder engagement, resource planning, and process improvement. Proven ability to collaborate with cross-functional teams to deliver scalable, cost-effective, and high-impact technology solutions on time and within budget. Proficient in JIRA, Confluence, MS Project, and other project management and collaboration tools. Skilled in aligning project deliverables with strategic business objectives to drive operational efficiency and measurable results.

WORK EXPERIENCE

Senior Executive (Project Management-Techno Functional)

HCL Technologies

May 2023- Present

- Managed demand intake for new IT deals, including BAFO analysis, while evaluating sizing metrics and revenue forecasts to support project planning and strategic decision-making.
- Oversaw project timelines, resource allocation, stakeholder communication, status reporting, and documentation; regularly gathered updates and shared progress with leadership.
- Tracked utilization of 900+ FTEs across multiple projects, identifying underutilized resources and optimizing workforce allocation to improve efficiency.
- Delivered timely financial reports to leadership, tracking project profitability and variances; created and maintained dashboards for revenue, cost, and operational efficiency.
- Facilitated cross-functional communication between delivery teams and stakeholders to ensure seamless project execution and on-time delivery.
- Served as Business Analyst for internal projects, gathering requirements for the digital transformation team and ensuring timely delivery to automate processes and reduce manual effort.

Associate Professional Application Delivery

DXC Technologies

Oct 2018- Aug 2020

- Developed modules for incoming and outgoing cashflows for clients MetLife Insurance and Brighthouse Financials ensuring accuracy, compliance, and system efficiency.
- Contributed to the successful lift-and-shift migration of applications from the client environment to the DXC Technology infrastructure, ensuring minimal downtime and full system functionality.
- Designed process flows for batch job execution, managing file handling and task dependencies using Zena and MoveIT to ensure seamless automation and scheduling.
