- Stakeholder Engagement
- Risk management
- Jira
- Change management tools
- Communication
- Project Management
- Impediment removal and conflict resolution
- Security Tools
- Agile and SCRUM Frameworks

PROFESSIONAL EXPERIENCE

FICO, Bengaluru

June 2022 - Present

Project Manager/SCRUM Master

- **Project Documentation:** Led comprehensive project documentation including SOWs, architecture diagrams, and scope definition using Confluence and JIRA.
- **Backlog Management:** Created and estimated story points for JIRA stories using MOSCOW prioritisation in prioritizing backlog items to maintain efficient and goal-driven sprints.
- **Scrum Leadership:** Facilitated Scrum ceremonies, including daily stand-ups, sprint planning, sprint reviews, and retrospectives, fostering communication and team alignment.
- **Agile Project Management:** Spearheaded Agile adoption and transformation for teams by coaching and mentoring team members on Scrum principles, resulting in increased productivity and improved team engagement.
- **Reporting and Metrics:** Developed customized Jira reports and used Jira Data Centre to track team progress and derive insights for continuous improvement.
- **Risk Mitigation:** Identified and resolved risks and dependencies, ensuring project success.
- **Stakeholder Coordination:** Partnered with cross-functional teams to deliver business-driven solutions and manage resource allocation effectively.
- **Change Management Process :** Optimised the change management process by using tools like ServiceNow.
- **Budget Management:** Managed project budgets of up to \$1.5M, consistently delivering on time and within allocated resources.
- **Security Operations:** Led the adoption of integration security workflows within CI/CD pipelines, ensuring successful security signoffs and compliance with organizational security standards.
- **End-to-End Pipeline Automation:** Implemented CI/CD pipelines with adherence to Secure Software Development Lifecycle (SSDLC) best practices, ensuring security and compliance throughout the deployment process.
- **Process Automation:** Automated deployment workflows using GitHub Actions , reducing system downtime by 30%.

Research Manager

December 2024 - Present

PMI Research on Project Management Professionals (PMP)® PMI Global Headquarters

- Collaborated with PMI's research team to provide insights into the career needs of project management professionals, including challenges in career advancement, promotion, and peer recognition.
- Shared detailed feedback on the PMP exam process, preparation methods, and practical application of PMP principles to help shape resources and tools for aspiring and certified PMPs.
- Mentored students preparing for the PMP certification and conducted surveys and interviews based on their experiences to gain insights and improve the certification process.
- Contributed to discussions on hiring practices and self-development opportunities for project managers, supporting PMI's mission to advance the profession globally.

FICO, Bengaluru

July 2021 - June 2022

Software Engineering Intern

- Awarded Multiple SPOT Awards: Recognized with over four SPOT Awards during my internship for consistently exceeding work expectations.
- CI/CD Expertise: Proficient in designing, implementing, and maintaining robust CI/CD pipelines using tools like Jenkins.
- Agile Collaboration: Experienced in collaborating with clients, product owners, and development teams across all phases of the Agile development process.
- Onboarding Leadership: Developed structured pathways and resource guides to onboard and mentor new interns within the team effectively.
- Hiring Contributions: Conducted interviews for intern recruitment, evaluating candidates from various colleges to support team expansion.
