Full Stack Developer (Node.js & Cloud Solutions)

Senior Full Stack Developer with 4+ years of experience specializing in Node.js, cloud technologies, and edge computing solutions. Expert in building scalable distributed systems using Cloudflare Workers, AWS, and modern JavaScript frameworks. Proven track record of delivering high-performance applications with focus on edge computing, serverless architectures, and microservices. Strong background in database design, API development, and cloud infrastructure management. Demonstrated ability to lead technical initiatives and collaborate effectively in cross-functional teams.

WORK EXPERIENCE

Exliensoft consulting services

02/2024 – Present

Full Stack Developer (Node.js & Cloud Solutions)

Noida sec 63

- Architected and implemented edge computing solutions using Cloudflare Workers, resulting in 40% reduction in global response times
- Developed serverless applications handling 1M+ daily requests using Cloudflare Workers and KV storage
- Built real-time data processing pipeline using Cloudflare Durable Objects and WebSocket connections
- Implemented custom authentication middleware using Cloudflare Workers with JWT tokens
- Created automated deployment pipelines using GitHub Actions and Cloudflare's Wrangler CLI
- Designed and maintained distributed caching system using Cloudflare KV and Redis
- Optimized API performance through edgecaching and compute-at-edge strategies
- Led team of 3 developers in modernizing legacy applications using cloud-native technologies

Ad2click media private ltd

02/2023 – 11/2023

Full Stack Developer (Node.js)

Noida sec 15

- Developed scalable backend services using Node.js and Express.js for handling marketing analytics
- Implemented real-time tracking system processing 500K+ events daily
- Built and maintained RESTful APIs for campaign management and reporting
- Integrated multiple payment gateways and third-party marketing APIs
- Optimized database queries and implemented caching strategies using Redis
- Created automated reporting system using Node.js and MongoDB aggregation pipeline
- Managed AWS infrastructure including EC2, S3, and Lambda functions
- Achieved 99.9% uptime for critical marketing systems

Itio innovex private ltd

03/2021 – 01/2023

PHP Developer

Kaushambi UP

- Developed and maintained payment processing systems using PHP and MySQL
- Implemented secure payment gateway integrations with major providers
- Created automated reconciliation system for transaction processing
- Built custom reporting tools for financial analytics
- Maintained high-availability systems with 99.9% uptime
- Reduced payment processing time by 30% through optimization
- Implemented fraud detection system using machine learning algorithms
- Managed team of 2 junior developers

Kr mangalam group
PHP Developer

01/2020 – 02/2021
Delhi chattar pur

- Developed student management system using PHP and MySQL
- Created online examination portal with real-time assessment
- Implemented automated grading and report generation system
- Managed hosting infrastructure and database optimization
- Reduced manual data entry time by 60% through automation
- Integrated payment gateway for fee collection
- Created mobile-responsive design for better accessibility

EDUCATION

MCA in Cloud Computing and Distributed Systems

IGNOU • GPA: 8.5

01/2022 – Present

BCA

IGNOU • GPA: 8.2

01/2017 – 01/2021

First Division with Distinction

12th in Science Stream

CBSE BOARD

01/2017

Percentage: 75%

10th

CBSE BOARD

01/2015

Percentage: 78%

CERTIFICATIONS

AWS Certified Developer – Associate

Cloudflare Workers Certification

Node.js Advanced Development

MongoDB University Certification

Docker Essentials

AWARDS & SCHOLARSHIPS

Best Developer of the Quarter

SKILLS

Programming Languages & Frameworks: Bootstrap, CSS3, Express.js, Gatsby, GraphQL, HTML5, JavaScript, Next.js, Node.js, PHP, React, REST, TypeScript, WebSocket

Cloud & Infrastructure: API Gateway, App Platform, AWS EC2, CDN, Cloudflare Workers, CloudFront, Cloud Functions, Cloud Storage, CloudWatch, Digital Ocean Droplets, Durable Objects, Edge Computing, Google Cloud Compute Engine, KV Storage, Lambda, RDS, S3, Spaces, Workers KV

DevOps & Tools: Datadog, Docker, Docker Compose, Git, GitHub, GitHub Actions, GitLab CI, Jenkins, Kafka, New Relic, Nginx, PM2, Retool, Vercel

Edge Computing & Performance: API Security, Browser Caching, Cloudflare KV, Cloudflare Workers, JWT, Load Balancing, OAuth, Redis, Service Workers, SSL/TLS, Web Vitals Optimization

Database: Cloudflare KV, MongoDB, MySQL, Redis
