SUMMARY

Experienced Node Js/Backend developer with building high-performance APIs and designing scalable database solutions. Proficient in creating efficient backend systems for industries such as edtech, e-commerce, and influencer platforms. Known for delivering optimized code and robust data modeling to enhance application performance and reliability.

TECHNICAL SKILLS: Expertise in **Node.js, JavaScript, MongoDB, Redis, Angular, TypeScript, Express.js, Sails.js, NestJS,RESTful APIs,Git** and more. Adept at problem-solving, data handling, and developing responsive, efficient applications while collaborating with cross-functional teams.

PROFESSIONAL EXPERIENCE

EDUKIT   Noida, Uttar Pradesh, India
Node Js Developer   *Jan 2023 – Present*

As a Node Js Developer, I revolutionized the edtech platform by implementing robust systems that streamlined course delivery and assessments, resulting in increased student engagement. Utilizing the Bull library, I expedited data export and import processes, enhancing overall data management efficiency.

Edukit Product

- **Implemented** features like task assignment, progress tracking, and real-time notifications.
- **Developed** modules for course creation, user management, and performance tracking.
- **Implemented** a live tracking solution using **Google Maps API** for monitoring bus routes and stoppages.
- **Developed** a **real-time tracking** feature to provide accurate and up-to-date location information.
- **Utilized Bull** queue library for exporting and importing **large-scale** data of students.
- **Payment gateway** and **POS** machine support to enable seamless fee collection and on-site transactions.

StartupLynk

- **Designed** and **developed** a robust backend system to implement cutting-edge APIs for a dynamic startup funding platform.
- **Demonstrated** expertise in creating secure and scalable solutions, optimizing registration processes.
- **Streamlined** fund acquisition procedures, significantly enhancing the platform's efficiency.
- **Enhanced** overall system performance and reliability, contributing to improved user experience and operational success.

ESACLE   Noida, Uttar Pradesh, India
Node Js Developer   *Jun 2022 – Dec 2022*

Developed and optimized features for various e-commerce platforms, including invoice and shipping label generation, integration with Shiprocket **and Payment gateways,** and implementing voucher systems. Enhanced user experience and streamlined operations for online shopping websites such as **Arjoi Mart, Toyvala,** and **Gajari**.

Deckster.club

- Developed and optimized APIs for Deckster.club, an influencer-based platform.
- Improved platform reliability and user satisfaction through effective API integration and performance tuning.
- Executed R&D on **Instagram, Facebook, and YouTube APIs,** enhancing data collection and integration for better user insights.

GAIL India Limited   Auraiya, Uttar Pradesh, India
Apprentice Trainee (Mechanical)   *Feb 2021 – Feb 2022*

Completed an apprenticeship in Mechanical Engineering, focusing on maintenance engineering. Gained hands-on experience in maintaining and troubleshooting mechanical systems, which enhanced operational efficiency.

EDUCATION

GRADUATION : Bachelor of Technology in Mechanical Engineering | 79.76 % | *AKTU Lucknow 2014 - 2018*

ACHIEVEMENTS : Most Scholar Student Award (2012)| GATE Qualified (2019) |**Employee Of The Quarter (Sept-2023)**.

CERTIFICATIONS : From Udemy : Javascript|Node Js|MongoDb|Express Js|Angular|Typescript
