Mohd Arsh

Personal Summary

4 Years plus Experienced Node.js Developer with a strong background in backend development, API design, and server-side logic. Skilled in writing clean, efficient, and scalable code for web applications and services. Proficient in designing and implementing RESTful and GraphQL APIs, integrating with databases, and ensuring data security. Capable of leading development teams, making architectural decisions, and mentoring junior developers. Experienced in Optimizing performance, troubleshooting issues, and deploying applications to production environments.

Passionate about staying updated with the latest technologies, and delivering high-quality solutions to meet project requirements.

Skills

- JavaScript
- ES-6
- Node.js
- Express.js
- nestjs
- REST API
- GraphQL API
- mongodb
- MySQL

- CI/CD
- Jenkins
- GraphQL
- aws-ec2
- MVC
- Passport.js
- JWT authentication
- redis
- type-orm

- React.js
- AngularJS
- Typescript
- redux
- html
- css
- git
- github

Work Experience

10/2024 - Current
Advaiya Solutions Private Ltd

Working as a Node.js developer in **Adani Digital Labs,** using GraphQL on top of Node.js and NestJS for backend services.
Working on the Food and Beverages LOB of the **Adani One app.**
Managing the food and beverage line of business in different stores, handling end-to-end store management.
Using TypeORM for database management.
Investigating and resolving technical issues in the production system.

SENIOR NODEJS DEVELOPER 05/2023 - 09/2023
BhumiiTech Pvt Ltd

Developed Restful Api's using Http methods
Developed GraphQl Api's to make reduce network latency as per the requirement
Writing clean efficient and maintainable code
Identifying and resolving performance bottlenecks in backend systems.
Setting up deployment pipelines for automated deployment using jenkins and github webhook.
Managing a Team a 4 members

BACKEND DEVELOPER 05/2022 - 05/2023
Bhumiitech Pvt Ltd

Writing server side web application logic using Nodejs.
Developing Restful Api's and Backend Services
Implemented data storage solutions using Databases like mongodb PostgresSQL
Handling Authentication and Authorization mechanism
Integrated third-party Api's and services into the Application
Writing efficient queries and database operations
Implemented data caching mechanism for improved performance using redis server

REACTJS DEVELOPER 07/2021 - 05/2022
Bhumiitech pvt ltd

Building reusable UI components using reactjs
Managing application state using state management tool i.e Redux
Optimizing components for maximum performance
Developed ui for mobile Response screens
Integrating Front-end elements with backend services

Education

Bachelor of Technology, Computer Science, 07/2021
GGSIPU, New Delhi
