MEAN Stack Developer

## PROFILE

A highly motivated and results-driven **MEAN Stack Developer** with 2 years of hands-on experience in building scalable, efficient, and user-centric web applications. Expertise in **Angular** and **Node.js**, with a strong ability to design responsive user interfaces and integrate complex backend services. Adept at problem-solving and continuously learning new technologies to stay current with industry trends.

Seeking to leverage my technical expertise and passion for development in an innovative team to create seamless digital solutions.

## WORK EXPERIENCE (2 years)

### RNVP Technology — *MEAN stack Developer*

Feb 2023 - PRESENT

#### **Finclub.mu:** (<https://finclub.mu>)

Finclub is a comprehensive financial management platform designed to simplify personal finance tasks. Features include budget tracking, expense categorization, bill reminders, investment monitoring, and goal setting.

#### Responsibilities:

- **Frontend Development** using **Angular** to build dynamic, responsive user interfaces.
- Designed and implemented **reusable UI components**, increasing development efficiency and consistency across the platform.
- Integrated **RESTful APIs** for efficient data communication between the frontend and backend services.
- Conducted thorough **testing and debugging**, ensuring high performance and minimal downtime.

---

#### **I2IFUNDING.COM** (<https://www.i2ifunding.com>):

A peer-to-peer lending platform connecting borrowers with investors to provide competitive interest rates.

## DETAILS

Sector 62 Noida

Uttar Pradesh, India

9065856630

sandhyadhan02@gmail.com

---

## SKILLS

- **Frontend Development:** Angular, Next.js, HTML5, CSS, Bootstrap
