# PROJECTS

## Software Projects

📅 05/2022 - Present

Various software development projects involving ERP, HRMS, and CRM systems

- Developed an integrated ERP system consolidating finance, supply chain, inventory management, and reporting functions, allowing real-time data access for informed decision-making
- Designed a user-friendly HRMS to manage employee records, payroll, recruitment, and performance evaluation, ensuring legal compliance and enhancing employee satisfaction
- Created a CRM system to improve customer engagement through sales tracking, service support, and data analysis tools that enhance customer retention
- Implemented API authentication using JWT tokens to ensure secure communication
- Integrated Swagger for API documentation and seamless testing
- Developed logging functionality for each API to track and monitor system activities
- Utilized MySQL for database management and implemented ORM for efficient data interaction in a Node.js environment

## Core Php

📅 05/2022 - Present

Web development projects focusing on eCommerce and CMS integration

- Developed websites for eCommerce, marketing, and product platforms using CodeIgniter
- Implemented responsive design, real-time search, secure payments, and user-friendly navigation
