SUMMARY

Dedicated Node.js developer with over 2.4 years of experience building scalable and efficient backend systems. Proficient in developing RESTful APIs, integrating relational databases (Mysql, SQL Server), and designing robust architectures to handle high-volume data processing. Skilled in creating impactful solutions that streamline business processes, enhance user experience, and ensure data security.

WORK EXPERIENCE

PropLegit Global Pvt Ltd, Ahmedabad

Feb 2025

Node.js Developer

- Developed Proplegit, a B2B solution for banks to streamline loan verifications, and reduce NPAS.
- Used Angular and Node.js with SQL for robust database management, collaborating with HDFC, PNB, Adani Capitals, etc.

ESMSYS Pvt Ltd, Ahmedabad

Oct 2022 – Feb 2024 (Migrated to Proplegit)

Node.js Developer

- Led development for Jahernotice, a B2C project related to properties. We have these services: BPP, EPP, TP, Area Alert, Land record, and Ajini Jahernotice. Ensuring smooth admin module implementation.
- Enhanced user accessibility by developing a mobile app for Jahernotice.

Mahiti, Bangalore

July 2021 – Mar 2022

Python/Django Developer

- Contributed to backend development using Python and Django for various web applications.
- Developed and optimised features, managing APIs and database integrations.

PROJECTS

Proplegit – iPVR - Instant Property Verification Report

<https://www.proplegit.com/>

- Provides quick and reliable ownership and property verification, including liens and encumbrances.
- Enables banks to make informed decisions on mortgage loan applications quickly and efficiently.

Jahernotice - Protect Your Property

<https://www.jahernotice.com/>

- Jahernotice.com is a one-stop solution for individuals and businesses in the real estate industry.
- Addresses critical real estate concerns and supports land/property owners, builders, brokers, lawyers, investors, and high-net-worth individuals at all stages of the real estate lifecycle.
