SUMMARY

Software Developer with 2 years of experience at Tech Superiors Consulting, specializing in developing and optimizing backend systems. Proven expertise in building scalable applications for Healthcare, HRMS, and Background Verification using Python (FastAPI), Node.js, Express.js, Nginx, and Amazon EC2. Skilled in designing secure, high-performance APIs and managing cloud infrastructure. Seeking a Software Developer position to leverage my experience in backend technologies and drive the development of robust, efficient solutions.

EXPERIENCE

Software Engineer

Tech Superior Consulting

March 2023 - Present

- Experienced in leading teams and delivering robust software solutions across Banking, Healthcare, HRMS, and Background Verification domains. Specialized in backend development with expertise in Nginx, Amazon EC2, and Python (FastAPI), as well as frontend development using React.js, Next.js, and Vue.js. Proficient in mobile development with React Native, and skilled in cloud integration and infrastructure management. Strong focus on scalability, security, and performance, ensuring seamless integration and optimal functioning of complex systems.

Associate Software Engineer

Tech Superiors Consulting Pvt Ltd

February 2023 - February 2023, Gurgaon

- Completed an internship specializing in frontend development, where I gained practical experience working on real-world projects. Received training in building and optimizing user interfaces using technologies such as React.js and Vue.js. Developed skills in creating responsive, user-friendly web applications, contributing to enhanced functionality and user experience.

PROJECTS

HRMS

Tech Superiors Consulting • November 2024 - Present

- HRMS Project Developed an HRMS portal using React.js, Next.js, Node.js, and PostgreSQL. Designed a user-friendly interface, and built a secure backend for efficient data management. Integrated employee management, leave tracking. Ensured scalability, security, and compliance, customizing the portal to enhance HR efficiency and user satisfaction.

CRM(Client Relationship Management)

Tech Superiors Consulting • September 2024 – November 2024

- Played a key role in developing a CRM portal to streamline customer relationship management processes and improve client interactions. Leveraged Node.js, Express.js, and PostgreSQL to build a scalable and efficient server-side solution, ensuring seamless communication between the frontend and backend.
- Implemented RESTful APIs to handle CRUD operations for customer data, including communication history, follow-ups, and user authentication, providing a secure and efficient data flow.
- Designed middleware for advanced data validation, optimized query performance, and ensured real-time updates using WebSocket and event-driven programming, enhancing the responsiveness of the application.

AIW(Banking System)

Tech Superiors Consulting • December 2023 - August 2024

- Lead on the development of a cutting-edge banking system, spearheading the implementation of key features such as Interactive Voice Response (IVR), Video KYC, secure video calling, reconciliation processes, and a robust document storage system. Guided cross-functional teams to ensure seamless integration of these features into the banking platform, significantly enhancing customer experience and operational efficiency

ATS(Application Tracking System)

Tech Superior Consulting • August 2024 – Present

- Currently developing a comprehensive Application Tracking System (ATS) to streamline the recruitment process. The system will facilitate job postings, manage candidate data, and efficiently track applications from submission to hiring. Using Node.js for the backend and Vue.js for the frontend, the ATS is being designed to offer a seamless and user-friendly experience for recruiters and candidates alike. The development focuses on ensuring scalability, data security, and high performance to handle a large volume of applications effectively.

Background Verification Portal

Tech Superiors Consulting • March 2023 - December 2023

- Developed an automated background verification portal with a focus on backend architecture using Python with FastAPI and PostgreSQL. Created a secure and scalable backend to handle sensitive data and high-volume verification requests. Integrated Bold BI for customizable dashboards, providing real-time insights and analytics. Collaborated on the Vue.js front-end for managing verification requests, and implemented features like document verification, status tracking, and automated reporting to ensure data integrity and user experience.

EDUCATION

Master of Computer Application

DIT UNIVERSITY • Dehradun • 2023

Bachelor of Arts

2020

SKILLS

Node.js, Express.js, AWS Cloud Services, Microsoft Azure Cloud Services, MongoDB, PostgreSQL, Python FastAPI, GitHub, Bold BI, PM2, NGINX, Redis, HTML5, CSS3, Bootstrap, ReactJS
