SKILLS

Github	Postman
JavaScript	Node.js
Express.js	Sequelize
PI/SQL	Mongoose
Redis	Stripe API
Webhooks	Razorpay API

AWARDS

- Participated & Volunteered Inter-college Hackathon DCTM college
- Participated & Volunteered Inter Sports Meet Cricket Tournament.
- Winner

INTERESTS

Problem Solving	Leadership
-----------------	------------

LANGUAGES

English	Hindi
Expert	Expert

Dynamic and results-driven backend developer with 1.5 years of experience in building high-performance microservices and RESTful APIs. Skilled in Node.js, MongoDB, MySQL, and integrating secure payment gateways like Razorpay and Stripe. Proven track record in optimizing backend logic, implementing scalable solutions, and resolving complex issues across SaaS, EdTech, and FinTech domains.

EDUCATION

Delhi college of technology and management, Palwal, Haryana (July 01, 2017 - July 01, 2021)
B.Tech, Computer Science and Engineering

WORK EXPERIENCE

Coradius Technologies (August 04, 2023 - August 02, 2024)
Backend Developer

- Built microservices for Coradius's SaaS platform in insurance using Fastify.js, MySQL, and MongoDB.
- Integrated Razorpay for payment processing and used Redis caching for performance improvements.
- Wrote and optimized SQL & PL/SQL queries, views, and stored procedures to manage complex transactions.
- Played a key role in onboarding health insurance products to the ONDC platform, contributing to Registry (Staging) and pre-production phases.

Appening Infotech (January 20, 2025 - May 01, 2025)
Backend Developer

- Developed authentication (sign-up/login) and role-based access using JWT for Classmate, a Qatar-based student discount platform.
- Built REST APIs for category and vendor management, using Repository Pattern for clean MongoDB handling.
- Worked on License Portal for managing various business licenses, primarily handled Business License (BL) module.
- Integrated Stripe payment gateway with webhooks to save receipt URLs for completed transactions.
- Refactored and implemented a 600-line app cloning feature api, enhancing performance and maintainability.
- Briefly contributed to Verso, a third-party payment platform, reviewing API integration flow.

PROJECTS

EXPENSE TRACKER
Application where a user can signup and login, add and remove expenses.

- Built with Node.js, Express, Sequelize, and MySQL.
- Added JWT auth, bcrypt encryption, and premium reporting via SQL queries.

<https://github.com/tauheedism/Expense-Tracker-Node.JS>

Group Chat Application
Application where users can login and send and receive messages

- Built with Node.js, Express, Sequelize; followed MVC pattern.
- Users can create groups, chat, and promote admins with role-based access..
