PERSONAL PROJECTS

CULTFIT CLONE

Created sleek web pages for Cult.fit, a top health and fitness company that blends digital and offline solutions in fitness, nutrition, and mental well-being using *ReactJs*, *ExpressJs*, *MongoDB* & *Bootstrap*. Implemented a seamless & fully responsive UI.

EXPEDIA CLONE

Developed the homepage and hotel's page for Expedia, highlighting advanced web development skills in a solo project using *ReactJs*.

EXPERIENCE

MOBIUS BY GAIAN | FULLSTACK DEVELOPER

June 2023 - Present | Hyderabad, IND

- Engineered an IoT automation app utilizing technologies such as MQTT, JavaScript, React, and Three.js, optimizing render time to 0.10 seconds through the implementation of debounce and spatial navigation, and integrating third-party APIs for enhanced functionality and scalability.
- Significantly contributed to the frontend codebase of a User Experience Builder platform using React.js, GrapesJS, and Mapbox, developing drag-and-drop components and streamlining version updates with CI/CD processes.
- Spearheaded the development of a wide range of end-to-end applications with a strong emphasis on front-end technologies, ensuring high performance and user-centric design.
- Led a team of five throughout the software development life cycle, effectively prioritizing tasks, conducting thorough testing, and maintaining robust development standards.
- Mentored and on-boarded numerous freshers, accelerating their integration and enabling them to contribute efficiently to internal projects by familiarizing them with the company's products.
- Executed a successful Proof of Concept (POC) for converting web applications to Android and iOS platforms using CapacitorJS and React Native Expo, and developed an internal JIRA sprint review dashboard, incorporating detailed infographics using Chart.js and Atlassian Jira APIs.

FREELANCE | FRONT-END ENGINEER

Nov 2022 - May 2023 | Hyderabad, IND

- Developed a user-centric chess academy website using JavaScript, React, and MongoDB, enabling seamless booking of tournaments, classes, and camps, while incorporating a homework tracking system accessible to students, parents, and coaches.
- Optimized application performance by implementing Global Context, reducing API calls by 10, and enhancing code efficiency through centralized scripts.
- Facilitated increased engagement by creating an inviting platform for chess enthusiasts to participate in interactive and exciting classes.
