
PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience delivering scalable frontend and backend solutions. Achieved 300% performance improvement in past projects. Skilled in optimizing systems and tackling complex challenges with innovative solutions.

EXPERIENCE

Promena LLP, Bengaluru

Aug 2024 – Present

Software Developer

- Engineered LLMs with the ability to ingest and process individual-specific datasets, enabling tailored recommendations and task management. Designed an intuitive interface for easy data input and model fine-tuning.
- Delivered AI assistants that significantly enhanced user productivity, enabling automation of routine tasks and providing smarter, data-driven support in daily life.
- Wrote scalable backend APIs for real-time shipment tracking, ensuring accurate location updates. Built a document submission and storage module with secure processing.
- Enhanced operational efficiency, enabling the platform to manage high shipment volumes with 99.9% system uptime and faster document handling.
- Developed a user-friendly web application with integrated payroll processing and automated pay slip generation.
- Reduced pay slip generation/distribution time by 99%, eliminated manual errors, enabling faster payroll processing and enhanced satisfaction.

CSI Computech Pvt. Ltd. India

May 2023 – Aug 2024

Software Developer

- Streamlined processes to eliminate errors and added features to generate detailed reports and billing statements.
- Reduced collection time by approx. 60%, eliminated discrepancies entirely.
- Created a robust system to automate milk collection workflows, optimized data validation to handle ₹40M in billing every 10 days. Awarded with the **Most Innovative Solution for Farmers**.
- Crafted high-performance APIs capable of handling hundreds of requests per minute, improving system responsiveness tenfold.
- Improve the system's performance to handle high traffic and ensure quicker response.
- Implemented a rate limiter to manage server load and optimized database queries to reduce latency.
- Achieved a 300% improvement in response time, ensuring a faster, more efficient monitoring system.
- Designed APIs for digital lockers in malls and apartments, providing a secure storage solution.

VR Guides Pvt. Ltd.

Feb 2023 – May 2023

Software Developer (Intern)

- Built an admin portal for a VR travel web application, enabling efficient management of user data and platform settings.
