EMPLOYMENT HISTORY

JUNIOR DEVELOPER AT CODING WEB

WORK EXPERIENCE

Eregs App

- The app included fetching data from a website in json format which was way to nested and then formatting its data for tables images and section points into a properly designed manner with key functionalities of adding a note, highlighting the points and with proper authentication .
- Challenge : The data fetched from the website was way to nested and with no unique identity to be properly organized in the website had to improve the asynchronous nature of javascript in order to achieve the requirements.

FlyingJet App

- This app was completely based on next.js technology which includes both ui and server side in the same project.
- Achievement : Designed the app in the professional manner with proper state management and best practices as per industry standards.

Dating App

- It was a dating app to be made as per the requirements it shared most of the similarities and functionalities like the tinder dating app. This included showing users based on location, gender, age , other preferences and also included storing multiple profile photos and showing them on ui.
- Challenges: Proper Authentication as per the industry standards storage and data saving . Also had to make the ui more user friendly without any lag with lots of state management.

- Car Rental Mobile App (React Native + Express.js)
- Milton Web App and Mobile App (React + Express.js)
- Scrimmage App Server (serverless architecture)
- Etc.
