SKILLS

- React JS
- Node JS
- Next JS
- java script
- Typescript
- Redux ToolKit
- HTML
- CSS
- git
- Material UI
- REST API
- MongoDB
- NoSQL

PROJECTS

Cryptometric Project | **03/2024**
- Developed a coin swapping feature using React.js for the frontend and Node.js for the backend API. Implemented functionality for users to swap their cryptocurrency coins, with the equivalent USD amount transferred to their MetaMask wallet. Utilized 1inch APIs to handle backend processes with Node.js

Project Tracking Tool | **02/2025**
- "I have developed a Project Monitoring Tool designed to track the daily status, updates, and completion percentage of tasks assigned to team members. In this tool, the admin has the ability to assign tasks to respective team members based on project requirements. The admin also receives real-time notifications about the status and progress of each ongoing project, ensuring effective monitoring and management of the team's activities. Technologies used in this project include ReactJS, NodeJS, PostgreSQL, and Tailwind CSS."

ACME SOLUTIONS Website | **12/2023**
I have created a full fledged Hosted website for an organization that deals in solar projects and is entering in IT projects i have used HTML,CSS,JAVA SCRIPT , REACT JS For the frontend and functionality part of the Website and i have created API's to store the data of the users in the Database And integrated those API's with the help of Node JS into my frontend **highlight key points**
