### SUMMARY

Full Stack Engineer with practical expertise in AWS cloud deployments and front-end and back-end development. At the moment, I oversee a group of ten developers who collaborate to create scalable, intuitive web apps and enhance system efficiency. I have a strong interest in learning new technologies, producing clear, effective code, and using technology to solve practical issues. I like working in dynamic settings where I can take initiative, work with others, and help create excellent goods.

### PROFESSIONAL EXPERIENCE

**Bottom Funnel Technologies Private Ltd.** MERN Stack Developer **Aug 2022 - Present**

Developed and maintained service-based and travel-focused websites, ensuring seamless functionality and user experience.

Led a team of developers across multiple projects, driving successful outcomes for diverse industry sectors

**Tech Stack:** NextJs | MongoDB | Node Js | JavaScript | BootStrap | Css |  
Jquery | Laravel | Mysql | Amazon Web Services (AWS)

### PROJECTS

**Bottom Funnnel:** Bottom Funnel is a leading IT service company that specializes in digitizing your business by developing cross-platform Apps, Web, Blockchain, and digital marketing solutions with enhanced UX/UI designs.

- Delivered tailored SaaS products across a variety of industry categories to meet specific client needs.
- Developed on-demand software solutions to address unique requirements across multiple sectors.
- Provided a versatile talent pool across categories, aligning skilled resources with project-specific demands.

**School Management System:** Developed a comprehensive School Management Application that streamlines administrative, teaching, and student operations, providing a unified platform for attendance, grading, and notifications, with intuitive interfaces for each user role.

- **Centralized Admin Control:** Enabled admins to create and manage classes, assign teachers and students, and set up secure login credentials for teachers.
- **Teacher Management Panel:** Provided teachers with tools to create classes, add students, manage attendance, and assign subject-specific grades.
- **Student Dashboard:** Developed an interactive dashboard displaying attendance percentages and subject-specific grades, offering students a clear academic overview.

**Blueberry Travels:** Developed a responsive, multi-device-friendly website for Blueberry Travels. Integrated APIs to manage various sections like blogs and other travel-related content, ensuring a seamless user experience across different platforms.

- Engineered and created a fully responsive website compatible with many devices.
- Incorporated external APIs for dynamic components such as blogs and trip updates.
- Ensured optimized performance and user experience across all platforms.

**Corporate Booking Tool:** Developed a corporate booking platform featuring integrated automobile rental services and mid-level administrative panels. Developed a master panel for centralized access control, data administration, and smooth redirection with automatic login to various project-specific administrative panels.

- Developed a corporate booking tool with integrated car rental management.
- Designed a master panel for centralized access control and data monitoring.
- Enabled auto-login and seamless navigation between multiple admin panels

**Car Rental:** Developed an extensive system for overseeing company vehicles, drivers, maintenance, and absences. Implemented a booking module for corporate and walk-in clients, accompanied by sophisticated analytics for monitoring and evaluating booking data across customized period ranges.

- Developed a vehicle and operator management system incorporating maintenance and leave monitoring.
- Developed a reservation feature for corporate and walk-in clients.
- Deployed analytics to monitor booking revenue data with customisable date filters.

**Blueberry Group:** Developed a comprehensive School Management Application that streamlines administrative, teaching, and student operations, providing a unified platform for attendance, grading, and notifications, with intuitive interfaces for each user role.

- Developed and executed the HR panel to facilitate the monitoring of applications and the posting of jobs in a seamless manner.
- Allowed applicants to use the career section to apply, monitor applications, and get updates
- Facilitated an intuitive and responsive interface for both Human Resources and applicants.
