PROFILE

With a solid foundation of over 3 years in web design and development, I'm adept at devising creative solutions tailored to various industries. Proficient in Angular, Node.js, Express.js, Ionic, MySQL, and MongoDB, with strong skills in database design and API development. Skilled in authentication, payment gateway integration, and security best practices for robust applications. Adept at Cordova and Capacitor for cross-platform mobile app development. Passionate about performance optimization and delivering seamless user experiences.
