WORK EXPERIENCE

Software Engineer (SDE) Intern
Blue Stock Fintech

📅 Oct' 03 – Dec'31   📍 Noida/Remote

Key Skills: JavaScript, MVC, Node.js, React.js, AWS
- Developed and optimized an admin panel for Blue Stock Fintech using JavaScript, React.js, Node.js, and MVC architecture, with a focus on responsive and efficient user experiences.
- Deployed and scaled up the application on AWS for improved performance and reduced downtime.
- It achieved its target of streamlining data management processes, reducing page loads to 30%, and general system reliability and code readability.

Accessibility Engineer
Magic Software

📅 Dec' 10 – Present   📍 Noida/Office

Key Skills: NVDA, Jira, Html, CSS, React.js, Software Testing
- Implemented and maintained digital accessibility standards, including ARIA roles and conformance to the WCAG 2.1 guidelines, which ensured an accessible user experience.
- Carried out accessibility audit and remediation, using tools like AXE, Lighthouse, and JAWS.
- Implemented automated accessibility testing in CI/CD pipelines using tools like a11y, Deque's axe-core.

EDUCATION

B. Tech in Computer Science Engineering
GLA University, Mathura

📅 Jul' 20 – May' 2024

Intermediate/+2 (BSEB)
J.M.C Sakari Kudra

📅 Apr' 17 – Mar' 19

Matriculation (BSEB)
S.N High School

📅 Apr' 15 – Mar' 17

PROJECTS

Blog Web Application   *GitHub   Web*

Key Skills: Tailwind, React.js, Redux, Firebase, Node.js
- I built a blog platform including features like blog creation, blog update, delete blogs, view user profiles, search blogs and secure authentication.
- Added admin controls for managing blogs, users, and comments with role-based access automatically.

E-Commerce Application   *GitHub   Web*

Key Skills: React Native, Redux, Node.js, MongoDB

- I Designed an e-commerce platform with services for product management and order processing.
- Implemented role-based authentication to manage secure access for customers and admins.
- An integrated payment gateway for smooth transaction processing.
- Added search functionality: This enables consumers to quickly access products.

Blog REST API   *GitHub   Web*

Key Skills: Node.js, MongoDB, Nodemailer, Cloudinary, Stripe

- Described a feature-rich Blog REST API that incorporated strong authentication, post management, and dynamic user interaction capabilities, including follow/unfollow, block, and profile viewer tracking.
- Admin and user controls were implemented for managing users, posts, and activity. Inactivity-based blocking was automated, and award assignments were made based on post contributions.
- These features, which include comment systems, profile photo uploads, password updates, and account closure, are all integrated for added value to the customer experience.

ACHIEVEMENTS

- Won the cricket tournament at GLA University in 2022.
