- Design, develop, test and deploy applications and websites.
- Create intuitive user interfaces using HTML, CSS and JavaScript
- Analyze and resolve issues related to applications and websites.
- Performed backup and recovery of databases on a regular basis
- Develop and maintain code using C# and Asp.Net
- Debug and troubleshoot applications and websites.
- Follow coding standards and best practices.
- Monitored and maintained web applications to ensure optimal performance.
- Utilized Node.js to develop server-side logic for web application development with React.
- Wrote user manuals and other documentation for roll-out in customer training sessions.

Project

- **Gate pass management system** - A web-based program called the Gate Pass Management System was created to effectively control staff arrivals and departures from a company.
- **Taxi management tool** - Better data management capabilities are provided by this system, which allows employees to reserve a taxi for officials visits. Requests for the same route and time can be combined, and users will receive the taxi, driver, and contact information well in advance.
- **File management system** - software that facilitates digital file organization, storage, and retrieval. Users can create, modify, copy, move, and search files with the use of FMS.
