### i-Pangram Digital, Surat

08/2020 - 06/2021

*Node.js Developer*

- Worked as a Node.js Developer, developing server-side logic and APIs.

### Orbio Solutions, Bengaluru

02/2019 - 04/2020

*Software Developer*

- Worked as a Software Developer, contributing to the development of software components.

## PROJECTS

---

### Grocery Price Comparison

Gathered product details from various e-commerce websites such as Amazon, Walmart, and Noon, and provided a price comparison across all competitors.

### Claims Management

It is a medical insurance workflow designed to track insurance claims raised by customers. The claims are managed by managers and supervisors who oversee and process them.

### Pit Services

It provides various services to customers such as auto industry services, towing of vehicles, auto repair services, and more.

### E-Commerce

It allows sellers to create a 360-degree view of their store and products. Each seller is provided with a separate dashboard to analyse their products and track visitor activity.

### Visualization and Monitoring

Retrieved data daily from multiple social media platforms based on specific keywords. Implemented data visualisation and monitoring based on various criteria.

### Collection Services

Developed a software solution to support multiple banks in managing and collecting microfinance loan repayments from customers. The system streamlines the loan collection process, tracks repayment schedules, sends reminders, and maintains customer records to ensure timely and efficient recovery.

## **EDUCATION**

---

**Master of Computer Applications (MCA)**

**08/2015 - 10/2018**

Bangalore University, Bangalore
