Education

Noida Institute of Engineering and Technology B. Tech (IT) - 79%

08/16 - 07/20

- Projects:- Trainee Portal (A Trainee Management System)

St. R. C. Convent School, Shamli 12th in PCM - 80%

04/15 - 03/16

- 12th in PCM St. R. C. Convent School , Shamli | April 2015 - April 2016
- Maintained a safe learning environment in the classroom and the lab
- Taught high school science classes, including Mathematics, chemistry, physics, and physical education

Projects

User Management

- User Management Application is a shared service Application, that authenticates and authorises user access. Users are assigned access permissions using User Management which are stored in Mongo db. When the user accesses the application with their Okta profile using Single Sign On (SSO), their access permissions comes from the User Manager and are evaluated to grant or deny them access to applications and components.
- What we have done with User Managements
- CONTROL user access and administrative privileges to the application
- REVIEW users and their access rights using search and/or filters
- MANAGE joiners, movers, and leaver's user permissions
- DELEGATE administrative responsibilities to external client users against users within their org

Notification Management

- The Notification Management System is for sending emails, toasts, or both types of notifications to the application users using a template and also provides a UI to manage those templates.
- uses simple standardized templates that define recipients, priorities, and destinations
- provides the ability for consuming services to pass event-specific data into the notifications

Taxonomy Suits

- Taxonomy Manager creates a record of how data should be formatted for your campaigns. It provides self-service administration to configure taxonomy rules and validations. You can control the accuracy of client data at its source and work with clean data from the start. With Taxonomy Manager, there's less time spent rectifying errors and more time delivering meaningful insight to clients.

Carrier Highlights

- Work on Prisma API Integrate with taxonomy suites
- Work on Airtable and Integrate with User Management.
- Work on SharePoint online and use this in the application for uploading data.

Awards

- Awarded with Spot award by Supervisor for showcasing initiative, pro-activeness, and creativity in the team.
- Awarded in NXCS Award with Rockstar Rookie
- Awarded in the yearly award and recognition function for good effort in work
- Standout Performer for the Month

Language

- Hindi
- English

Software

- Version control - GIT
- Operating system - Linux
- Development Method - Agile
- Task management - Jira

- IDE - VS Code

Framework & Libraries

- Express
- Material UI
- Jest
- Swagger-jsdoc
- React testing library

Key Skills

- Javascript
- React js
- Node js
- Mongodb
- Typescript
- GraphQL
- Redis
- Kafka
- HTML
- CSS
- Next js
