## PROFESSIONAL SUMMARY

I am a Software Developer with 3 years of experience in developing software applications. My strongest skills are in web development, designing functional user interfaces, and creating efficient algorithms. I have a proven track record of successfully completing projects on time I am highly skilled in JavaScript, React, Node.js, HTML/CSS programming languages. Committed to staying updated with emerging technologies and continuously enhancing skills to drive innovation in software development.

## TECHNICAL SKILLS

**Languages :** MongoDB SQL (Postgres, MySQL), JavaScript, TypeScript, HTML, XML, JSON, CSS, Sass
**Frameworks :** ReactJS, NextJS, Node.js, ExpressJS, Bootstrap  and API
**Tools :**  Postman, Github
**Others :** Design Patterns, Debugging, Root Cause Analysis

## EXPERIENCE

- **MERN STACK Developer**
- **Cevious technologies (November 2023 - March 2025)**
  - Successfully completed  projects in web development, specializing in MERN stack technologies.
  - Collaborated with clients to define project scopes, deliverables, and timelines.
  - Developed custom web solutions tailored to meet client requirements and preferences.
  - Demonstrated strong communication and problem-solving skills to address client feedback and ensure project success.

**Software MERN Stack Engineer**
- **Deepnap Softech (April 2023 - November 2023)**
  - Developed and maintained web applications using MERN stack technologies.
  - Implemented frontend frameworks such as React.js, Next.js, and Bootstrap.
  - Utilized backend technologies including MongoDB, Express.js, and Node.js.
  - Contributed to code optimization on GitHub and collaborated with team members on project development.

**Junior Trainee Software Developer**
- **4 Achievers (April 2022 - April 2023)**
  - Actively participated in software development projects, gaining hands-on experience in various aspects of software engineering.
  - Assisted senior developers in implementing software solutions, including frontend and backend development tasks.
  - Contributed to the design and development of new features and functionalities for software applications.
  - Demonstrated strong problem-solving skills and attention to detail in debugging and troubleshooting software issues.
  - Participated in code reviews and quality assurance processes to maintain code quality and integrity.

## EDUCATION

- Bachelor of Technology in Computer Science (Echelon Institute of Technology) |  GPA-7 2016-2020
- KL MEHTA sr sec school                                                    | GPA-6 2014-2016

## Projects

- **4 Achievers Projects:**
- **Language Translator (June-July 2022 MERN Stack)**
  - Contributed to the development of a language translator application.
  - Implemented features for text translation between multiple languages.
  - Utilized APIs and libraries to enhance translation accuracy and efficiency.
- **Live Weather App (Aug-Sep 2022 MERN Stack)**
  - Developed a live weather application to provide real-time weather updates.
  - Integrated weather APIs to fetch current weather data and forecast information.
  - Designed a user-friendly interface for easy navigation and access to weather information.
- **Display Websites(Nov-Feb 2023 MERN Stack)**
  - Designed and developed interactive, SEO-friendly display websites for businesses using React.js .
  - Integrated dynamic content management with MongoDB & CMS solutions, enabling seamless updates
- **Deepnap Softech Company Website (April-May 2023 MERN Stack)**
  - Developed and maintained the company's official website for Deepnap Softech.
  - Implemented frontend technologies such as React.js, Next.js, and Bootstrap.
  - Integrated backend functionalities using MongoDB, Express.js, and Node.js.
  - Collaborated with the team to ensure seamless functionality and user experience.
- **AFS Deals E-commerce Website (May-july 2023 MERN Stack)**
  - Contributed to the development of an e-commerce website for AFS Deals.
  - Implemented features for product listings, shopping cart, and checkout process.
  - Integrated payment gateways and ensured secure transactions.
  - Worked on frontend design and backend functionalities to meet client requirements.
- **Jhev Motors Booking and Demo Platform (July-Oct 2023 MERN Stack)**
  - Developed a booking platform for Jhev Motors to facilitate the booking and demo of electric vehicles.
  - Implemented features for users to browse products, book appointments, and schedule demos.
  - Utilized React.js for frontend development and MongoDB for backend data storage.
  - Ensured smooth user experience and seamless functionality of the platform.
- **Cevious technologies pvt ltd**
- **AI Unicorn Invoice and Subscription System (Nov-Feb 2024 MERN Stack)**
  - Developed an invoice and subscription system for AI Unicorn.
  - Implemented functionalities for generating invoices, managing subscriptions, and handling credit notes.
  - Integrated export to PDF and print functionalities for easy documentation.
  - Collaborated closely with the client to understand requirements and deliver customized solutions.
- **Setufi portal (Feb-April 2024 MERN Stack)**
  - Worked on development for the Setufi project, creating APIs using MongoDB, Express.js, and Node.js client side using React.js.
  - Designed and implemented APIs for data retrieval, storage, and manipulation.
  - Ensured data security and optimized performance of the portal.
- **MRAIX Portal (May-Feb 2025 MERN Stack)**
  - Developed a multi-tenant platform on Next.js, enabling businesses to manage company details, finances, and operations within a scalable architecture.
  - Integrated AI-powered support, providing automated insights, and predictive analytics for business growth
  - Designed custom fintech solutions with Tally-like accounting logics, and financial reporting.
