Javascript, HTML/CSS	NodeJS, Express, Mongoose, JWT, Docker, Git, Postman, jira	MongoDB, Redis, SQL	AWS, microservices, kafka, MinIO, Razorpay, socket.io

Experience

ZUHOUZ | Interior Designing Website ↗

Node Js Developer

2024-05-05 - Presesnt

Gurugram

- Javascript | Node.js | Express.js | Postgresql | Knex | JWT | Bcrypt | S3(MinIO) | Razorpay | JIRA confulence doc | Socket.io
- Architected and **developed 100%** of the project from scratch, utilizing **version control** throughout the entire development lifecycle.
 - Developed and secured **50+ REST APIs** (including user management, measurements, dashboards, payments, and FAQs) using **Bcrypt** emphasizing **low-latency** performance and **optimized code structure**.
 - Designed and implemented 20+ database schemas in **PostgreSQL (Knex.js)** and leveraged MongoDB for logging and **Redis for caching**.
 - Integrated **MinIO (S3-compatible)** with AWS SDK for asset storage and CDN delivery.
 - Implemented **Razorpay payment gateway**, invoice generation via **Puppeteer**, and real-time chat functionality using **Socket.io**.

PINGTREE Website ↗

Node Js Developer

2023-05-01-2-04-24

Ahmedabad

- JavaScript | Node.js | Express | MongoDB | Docker | Redis | API Documentation | JIRA | Postman |
- Reduced system issues by **31% through targeted bug fixes** and critical upgrades. **Validated 500+ application routes** for error responses using Express Validator.
 - Revised matrix calculations for leads across **30+ routes**.
 - Responsible for making **AM charts routes** with various filters, including date range filters.
 - Developed some of the Models and REST APIs where user can see the graphical data and 30+ crud operations.

WayRabbit Openstroke.io ↗

Software Developer Engineer

2021-09-05 - 2023-02-01

- Typescript | Node.js | Express.js | MongoDB | Mongoose | JWT | Bcrypt | S3 | Swagger Docs
- Worked on **2 projects** back-end system about **50% of the project** from scratch using Node.js, Express & Typescript, with databases MongoDB & Postgres.
 - Developed **60+ REST APIs** and wrote **documentation using Swagger UI** that allow users to try out APIs directly in the browser.
 - Followed industry best practices, company best practices. **Learned 3 new technologies such as Typescript, Postgres & Stripe**.
 - Designed 15+ schema models for User, Product, and Invoice etc. Implemented them using Mongoose library for MongoDB.
 - Integrated Digital Ocean Storage powered by S3 in the back-end using **AWS-SDK** to store project assets with a wide CDN Network.

FunctionUp, India

Backend Developer

2021-03-01 - 2021-07-31

- Developed and worked on **5+ projects** back-end systems & REST APIs using Node.js and Express, with database MongoDB.
- Proficient in using Git version control system and **AWS, S3 cloud storage bucket** to ensure effective project management.
- Acquired Redis familiarity and a strong understanding of caching fundamentals through URL shortener web app development.

Projects

Education

Dr. Shakuntala Misra National Rehabilitation University

Physics

7.88

2018-07-31 - 2020-09-30

Master Of Science(MSc.)
