PROJECTS

The-wild-oasis(link)

Description

- The-wild-oasis is a full-featured hotel management app designed to streamline hotel and hospitality operations for registered users.
- The app includes booking management, room service tracking, and detailed analytics to enhance efficiency and guest experience.
- Built using React.js for UI design with Styled Components, providing a modern and responsive interface.

Proshop(link)

Description

- The platform allows both users and admins to log in securely.
- Admins can add products, view all user information, and manage orders efficiently.
- Users can add products to their cart, view total items, and see the total price before checkout.
- Built using React.js for the frontend, Node.js for the backend, and MongoDB for database management.
