

# Deepanshu Rajput

## Software Engineer

Targeting Software Developer roles with an organization of high reputation with a scope of improving knowledge and further career growth .

---

## EXPERIENCE

### Kellton Tech Solutions, Gurugram

March 2021 – May 2024

### CV Infotech Solutions , Gurugram

July 2024 - Jan 2025

Developed and maintained scalable microservices architecture to handle high-volume transactions efficiently.

Implemented Kafka messaging system for real-time data streaming, ensuring reliable message delivery and fault tolerance.

Integrated webhooks for seamless communication between internal systems and third-party services, improving data synchronization and workflow automation.

Designed and optimized payment gateway systems to securely process online transactions, reducing latency and enhancing user experience.

Conducted code reviews and provided constructive feedback to improve code quality, maintainability, and performance.

### CMS Computers Ltd. , New Delhi

Jan 2025 - Present

Worked as a backend Developer with the team of a scalable web application while leveraging the technologies such as JavaScript, Typescript, ExpressJS, Prisma ORM, Node.js, PostgreSQL, REST APIs, Micro-services, github, postgres, AWS resulting in a streamlined user experience and increased client satisfaction.

Collaborated closely with cross-functional teams to integrate API's, to implement architect solutions, deliver high quality software products.

Developed RESTful APIs and integrated third-party services to enhance functionality and interoperability, driving efficiency and enabling scalable solutions.

## PROJECTS MANAGED

### SUPERMOJO ( Jan 2022 - Mar 2022)

This is basically a payment gateway to accept debit or credit card purchases from customers .

Environments : Nodejs ,Express ,Mongodb ,Reactjs ,Redux ,Stripe

### SASAI FINTECH ( June 2022 - April 2024)

It is cutting-edge mobile payment platform with a unique payment chat section, seamlessly integrating social interactions with financial transactions Environments :

Environments :Nodejs ,Express ,Dart ,Docker ,Spotlight ,Kafka ,Redis

### ULTIMA CHABOT (July2024 -Jan2025)

It is a chatbot which acts as a sales assistant for the crawled website which helps the users to know about its services while interacting with the chatbot that provides all the information about it and takes the user for purchasing the services or products .

Environments : Nodejs ,Nestjs ,Express ,Mongodb ,Jwt ,Openai, Redis

### NHAI Datalake 3.0 (Jan2025-Apr2025)

This project is a centralized platform built for the National Highways Authority of India (NHAI) to manage road infrastructure projects and agency operations. I worked on building a comprehensive attendance management system for users, enabling project creation for contractors, assigning road projects to agencies, raising road defect reports, and generating inspection reports. The system integrates secure identity verification using DigiLocker and FaceAuth, with robust backend services powered by Node.js and geospatial data managed via PostGIS.

Environments : Nodejs ,Express ,Prisma ORM ,PostgreSQL ,PostGIS ,Jwt ,AWS ,Jenkins

## TECHNICAL SKILLS

- NodeJS, JavaScript, ExpressJS
- PostgreSQL, MongoDB
- Micro-services, REST API
- Docker, Github, Jira, Postman, Sonarqube

## CORE COMPETENCIES

- Agile Methodologies
- Software development Life Cycle
- Restful API
- Debugging
- Web Services
- Performance Optimisation
- System Scalability

## **ACADEMIC DETAILS**

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE

Dronacharya College of Engineering - Khentawas, Gurugram (August 2017 - May 2021)

Grade - 7.0 CGPA
