## Summary

**3+ years of experience** in React.js, Redux, and JavaScript, focusing on developing innovative and high-performance software solutions. Passionate about building scalable, user-friendly applications with strong problem solving and collaboration skills

## Technical Skills

**Frontend:** React.js, Redux, Redux Toolkit, JavaScript, HTML, CSS, Grommet, Styled-Component, Tailwind, Jest, React Testing Library, Formik, Yup, UI/UX, Next.js, DOM, Web-Socket, Google Map APIs, Responsive Web Design, Sass

**DevOps & Tools:** CI/CD, AWS, Git, GitHub, Bitbucket, Version Control

**Performance & Security:** Lazy Loading, Vite, Babel, XSS Security, LightHouse

**Others:** API Integration, DSA, Linux

## Professional Experience

**Thoughts2Binary Pvt. Ltd.**

**Gurugram, India**

*Software Engineer*

*30th May 2022 – 30th Apr 2025*

- **Frontend development across 4+ high-impact projects**, overseeing **architecture, performance optimization, and best practices** to ensure **scalability, maintainability, and efficient UI/UX**.
- **Reduced First Input Delay (FID) from 4 minutes to 5 seconds**, as measured by **Lighthouse**, by **minimizing excessive API calls**, improving **page load speed, interactivity, and overall user experience**.
- **Managed and mentored 4+ junior developers**, conducting **code reviews, technical training, and knowledge-sharing sessions** to improve **team productivity and coding standards**.
- **Optimized application build size**, reducing load times and **enhancing performance, resource utilization, and deployment efficiency**.
- **Strengthened application security** by identifying and mitigating **vulnerabilities during penetration testing**, reducing **security risks** and ensuring **compliance with industry standards**.
- **Managed 10+ repositories on AWS CodeCommit and Bitbucket**, implementing **CI/CD pipelines, automated deployments, and streamlined version control**.
- **Collaborated with backend and infrastructure teams** to optimize **API integrations, reduce bottlenecks, and improve data flow efficiency**, ensuring **seamless communication between services**.

## Key Projects

*Titan Capital (React.js, JavaScript, Redux, Grommet, WebSockets, Bitbucket, OCR, API Optimization)* *May 2022 – Feb 2023*

- **Developed core modules**, built **reusable UI components**, collaborated with client developers, attended client calls, and streamlined platform **data synchronization via plugins**

*Granite (React.js, JavaScript, Design Patterns, System Scalability, Refactoring)*

*Feb 2023 – Sept 2024*

- **Built and maintained 10+ reusable core components, custom hooks, and helper functions** using various JavaScript and React libraries, ensuring flexibility and scalability across multiple projects.

*Worksana (React.js, JavaScript, Code Optimization, Security, Mentorship)*

*Oct 2024 – Apr 2025*

- **Upgraded outdated packages**, improved **security and performance**.
- **Refactored core components** for scalability and mentored junior developers.

## Education

**The Northcap University**

**Gurugram, India**

*B.Tech in Computer Science Engineering*

*2018 – 2022*
