Core Competencies

Full-Stack Web Development (MERN Stack)
RESTful API Development and Integration
Responsive Front-End Design (React.js, Tailwind CSS)
Backend Development with Node.js and Express.js
Database Management and Design (MongoDB)
Payment Gateway Integration (Razorpay)
Version Control and Collaboration (Git, GitHub)
Real-Time Data Handling and QR Code Integration
Integrated third-party tools like Razorpay (payment gateway) and SMS/Email services (Mailgun, SMSCountry) into live production systems.

Key Skills

PROGRAMMING LANGUAGES
JavaScript • C++

FRAMEWORKS & LIBRARIES
Node.js • Express.js • React.js • Redux • Redux Toolkit • Zustand • Vite

DATABASES
MongoDB • Firebase

TOOLS
Postman • Git • RazorPay Integration • JWT Auth • Mailgun • SMSCountry • Software Testing

MISCELLANEOUS
Linux • LaTeX • Microsoft Office

Experience

FULL STACK DEVELOPER
Innobles Smart Technologies
📅 May 2024 – Present   📍 New Delhi, India

Worked on several impactful government and enterprise-level projects. My role involved end-to-end development, from designing scalable architectures and building robust back-end services to creating dynamic, user-friendly frontend interfaces. I collaborated closely with cross-functional teams to deliver high-performance, real-time applications tailored to diverse user needs. Below are some of the key projects I contributed to:

- **Society Management System (Ongoing)** – Currently developing a society management portal focused on housing societies and RWAs. Features include online maintenance collection, facility booking, complaint management, member communication, and real-time reporting dashboards.
- **Waste Management System, Aligarh** – Developed a district-level waste tracking portal featuring a comprehensive role-based hierarchy (DM, CDO, DPRO, SafaiKarmi) for efficient waste management. Integrated a mobile app and real-time QR-based waste collection system to ensure live monitoring and reporting across Aligarh. View live
- **Land Acquisition Management System – Himachal Pradesh** – Engineered a government platform for managing and distributing land acquisition awards under the Gaggal Airport project. Streamlined compensation processes, beneficiary management, and transparent digital record-keeping. View live
- **Employee Management System (MYTE)** – Built a comprehensive task and employee management system enabling admins and managers to assign tasks, track work hours, monitor project progress, and generate real-time productivity insights. View live
- **Haryana City Bus Service Limited (HCBSL)** – Contributed to a transit management system aimed at modernizing public bus transportation with features like route management, live tracking, driver management, and role-based administrative controls.

MERN DEVELOPER INTERN
Ducat Institute, Noida, UP
📅 October 2023 – June 2024   📍 Noida, UP, India

MERN Stack Developer Intern for an eCommerce project, building and maintaining full-stack features, RESTful APIs, and managing real-time data with third-party integrations. View GitHub Repo

- Developed and maintained web applications, focusing on both front-end and back-end development.
- Built and integrated RESTful APIs for seamless user interactions and optimized system functionality.
- Collaborated with team members to implement new features and resolve technical issues across the application stack.
- Gained hands-on experience in deploying and managing databases, handling real-time data, and integrating third-party APIs.
