Work Experience

Subhx Infotech Pvt Ltd

Karnal , India

Software Developer

Apr 2025 - present

Backend Developer

- Developed a **Crypto Exchange Web App Trading Platform** that facilitates seamless crypto trading and real-time market updates for users.
- Created a **Blog Announcement Feature** to enable administrators to post updates, news, and important announcements directly on the platform, keeping users informed.
- Developed a **Frequently Asked Questions (FAQ) Feature** to provide users with easy access to common queries and information about the platform's services.
- Integrated a **Coin API Fetching System** that retrieves the latest cryptocurrency prices and market data every **1 minute** using **Redis** for caching and ensuring low-latency responses.
- Implemented **Redis caching** to store frequently accessed market data, significantly improving the platform's performance by reducing API call latency.
- Designed and developed **user profile management features**, allowing users to securely manage account settings, trading preferences, and security settings.

Shiva Clicksoft Pvt Ltd

Karnal , India

Software Developer

Dec 2024 - Jul 2025

Full Stack Android Developer

- Developed **Fitzee Mumbai**, an interactive web-based learning platform tailored for fitness enthusiasts in Mumbai, enabling users to access workout plans, nutrition guides, and personalized training sessions..
- Designed and implemented the **user authentication system** using **JWT** for secure login and session management.
- Created a robust **backend architecture** with **Node.js** and **Express.js**, ensuring seamless integration with the front end and efficient data handling.
- Developed an intuitive **admin dashboard** for managing user data, content, and performance tracking.
