

Pooja Kumari

Backend Developer

✉ pooja538.kumari@gmail.com

in https://www.linkedin.com/in/pooja-kumari-8b6339213/

📍 Noida Sector 15

HIGHLIGHTS

- **2 years of experience** in backend development with Node.js
- Well-versed with **REST APIs**, **GraphQL** and **Express.js**
- Experience with **MongoDB**, **Mongoose** and **MySQL** for database management
- Experience working on **Node.js**, **Express.js**, **Electron.js**, **JavaScript**
- Experienced with **Asynchronous programming** and **Promises**
- One of the **Interviewer** to evaluate candidates for backend developer roles.
- **Leading software team** for daily requirements and task flow

EXPERIENCE

Team Leader

NPR SUPPORTING SERVICES PVT LTD

📅 Feb 2023 - On-Going

📍 Noida

- **API Development:** Designed and developed **REST APIs** and **GraphQL** endpoints for various applications, ensuring smooth communication between the frontend and backend systems.
- **Database Management:** Worked with NoSQL (MongoDB) and SQL (MySQL) databases for data storage and retrieval. Utilized **Mongoose** for MongoDB schema modeling and **Prisma** for MySQL.
- **Backend Logic:** Wrote efficient, maintainable, and testable code using modern **JavaScript/Node.js** standards.
- **Programming:** Implemented complex asynchronous workflows using **Promises**, **async/await** and **event-driven** patterns.
- **Team Leadership:** Led a software development team for daily requirements and task flow, ensuring timely delivery of features and bug fixes.
- **GCloud Deployment:** Deployed and maintained backend applications on Google Cloud (GCloud), ensuring high availability, scalability, and performance optimization.

PROJECTS

Hawkeye

School Bus Tracking System

📅 Jan 2024 - Mar 2024

📍 NPRSSL, Noida

- Designed and developed a real-time bus tracking system to monitor school bus routes.
- Implemented automatic notifications for parents in case of mishappenings.
- Developed a parent-facing tracking feature to provide live location updates of children.
- Architected a multi-tenant database system to support different schools with isolated data.
- **My Role:** Solely handled the project, including backend development, deployment, and maintenance.
- **Techs:** Node.js, Express.js, MongoDB and Google Cloud

MyCkekUp

Doctor Appointment Booking Platform

📅 Mar 2024 - May 2024

📍 NPRSSL, Noida

- Developed and deployed APIs for both the mobile application and website.
- **Developed a role-based login system** with authentication based on TypeOfUser (Patients, Doctors, Admins).
- **Integrated OTP verification** via email and SMS for secure authentication.
- Built a backend system that allows patients to find doctors based on location and specialization.
- **Implemented a slot-based appointment booking system** for both online (video consultation) and in-clinic visits.
- Designed a **dynamic slot allocation system** that considers doctors availability, booked appointments, and consultation duration.
- Designed a scalable database structure to manage doctors, patients, appointments, and availability.
- **Techs:** Node.js, Express.js, MongoDB and Google Cloud

Maflam

Bilingual Learning Management System (LMS)

📅 May 2024 - July 2024

📍 NPRSSL, Noida

- Designed a **bilingual content delivery system**, providing course materials in Arabic and English from the server side.
- Implemented **OTP-based authentication** for secure user login and **integrated Google Login** for seamless access.
- Built a role-based access system for students, instructors, and admins to manage courses and learning materials.
- **Techs:** Node.js, Express.js, MongoDB and Google Cloud

RRGames

Online Gaming platform

📅 July 2024 - Sept 2024

📍 NPRSSL, Noida

- Live Game Data Fetching (**Third-Party Integration**)
- Deposit & Withdrawal System
- Bet Management (User Side)
- Admin Panel for Transaction Management
- **Techs:** Node.js, Express.js, MongoDB and Google Cloud

ESWOP

ERP For Device Management System

📅 Sept 2024 - Dec 2024

📍 NPRSSL, Noida

- User Management System
- Device Inbound Handling
- Quality Check (QC) & Fault Identification
- Spare Part Allocation & Warehouse Management
- Engineer Job Work & Repair Process
- **Techs:** Node.js, Express.js, MongoDB and Google Cloud

Mr.Genie

One Stop Solution Platform

📅 Dec 2024 - On-Going

📍 NPRSSL, Noida

- Provides a **single platform** where users can find multiple services and products.
- Simplifies **ordering, tracking, and receiving deliveries** for daily essentials.
- Connects vendors with potential customers through a **centralized marketplace**.
- Acts as a logistics partner to ensure smooth and timely deliveries.
- **Techs:** Node.js, Express.js, MongoDB, GraphQL and Google Cloud
