Profile

Frontend Developer with 2 years of experience building high-performance web applications. Skilled in React, Redux, and Tailwind CSS, delivering responsive and scalable UI components. Collaborates closely with designers and developers to enhance user experiences. Familiar with backend technologies like Node.js and MongoDB.

Technical Skills

Programming Languages: JavaScript, HTML, CSS.

Frameworks/Libraries: ReactJS, Redux, NodeJS, Express, Mongoose, Tailwind, NextJS.

Databases: MongoDB, Firebase's Firestore.

Development Tools: Git, Azure DevOps Board, Jira, VS Code.

Professional Experience

PwC {Associate Software Engineer}

April 2024 – Present

- Implemented new features and UI improvements using ReactJS, Tailwind CSS, and JavaScript, enhancing performance and user experience.
- Developed interactive data visualizations with Chart.js, improving data analysis efficiency by 40%.
- Refactored state management with Redux, leading to 30% fewer API calls and improved application performance.

PwC {Senior Analyst}

July 2023 – March 2024

- Translated UI/UX mockups into reusable React components, reducing development time by 15%.
- Built responsive frontend features with ReactJS, Tailwind CSS, and JavaScript to improve accessibility.
- Collaborated with designers and backend developers to enhance user workflows and application performance.

PwC {Intern (Software Engineering)}

January 2023 – June 2023

- Gained hands-on experience in ReactJS, Node.js, Express, and MongoDB through project-based training.
- Worked in a team to develop a full-stack web application, focusing on frontend development.

Projects

Inventory Management System | WebApp

- Built an inventory management system for an FMCG client using React, Redux, and TailwindCSS.
- Developed a table-based UI to display different order status with sorting and filtering options for efficient data navigation, improving data analysis efficiency by 30%.
- Built reusable modular components and integrated REST APIs, improving performance and maintainability.
- Managed application state using Redux, ensuring seamless API data handling and enhanced user experience.

Netflix-GPT | AI-Powered Movie App

- Used Firebase database to store user credentials and Firebase API for SignIn/SignUp.
- Home Page features a dynamic background trailer and categorized movie lists (Popular, Now Playing, etc) using TMDB API.
- Integrated Gemini API to suggest movies based on user prompts, displaying posters, ratings, and descriptions.
- Built with React, Redux, Tailwind CSS, Firebase, and TMDB API.

Trip Tales | MERN STACK Web App

- Built a full-stack travel app with user registration, login, and CRUD functionality for managing places.
- Developed a secure backend using NodeJS, Express, and Mongoose, with JWT authentication and bcryptjs for password hashing.
- Integrated external APIs for geolocation and map rendering, allowing users to view and manage places interactively.
- Built with React, NodeJS, Express, MongoDB, and Multer for image handling.

Education

LNCT Group of Colleges, Bhopal
B.Tech (CSE)

2019 – 2023
CGPA: 8.91
