|--------------|--------------|-----------|-----------|
| • Node.js | • Javascript | • MongoDB | • Swagger |
| • Express.js | • Typescript | • Mysql | • GraphQL |
| • Keystonejs | • PostgreSQL | • Postman | • Git |

Experience

Algoworks Technologies Pvt. Ltd

Software Engineer

- I am an experienced Node.js backend developer with nearly two years of hands-on expertise in building scalable server-side applications and APIs that drive functionality and performance. With deep skills in Node.js frameworks, particularly Express.js, I have a strong foundation in database management, leveraging PostgreSQL to deliver efficient data handling and storage solutions. My work includes designing RESTful APIs, optimizing query performance, and ensuring that backend systems can handle high-load environments with minimal latency. I am committed to implementing security measures to safeguard data and manage real-time data flows, which helps maintain seamless user experiences. I excel in collaborative settings, consistently contributing high-quality, maintainable code and adhering to team coding standards. My passion lies in developing reliable, efficient backend solutions that enable robust and secure applications, enhancing both user satisfaction and operational resilience.

Projects

chopper swapper

- * Implemented Selenium to create an instance of Chrome in order to interact with the correct elements of the web page.
- * Built APIs to connect buyers and sellers on the platform.
- * Integrated Firebase notifications for seamless user updates.
- * Added chat functionality to improve user engagement.
- * Collaborated closely with the team to deliver features effectively.
- * Utilized Node.js, Express.js, JWT, Firebase, and bcrypt, with PostgreSQL as the database.

Voting And Funding App

- * Developed an application for both voters and candidates, enabling candidates to raise funds, discuss issues, and share campaign schedules.
- * Provided functionality for voters to support candidates through donations.
- * Collaborated with a team to implement major APIs, ensuring adherence to coding standards within a monolithic architecture.
- * Utilized PostgreSQL for robust database management.

Online Trading App

- * Developed an application for managing users' portfolios and balance sheets efficiently.
- * Collaborated with team members to build core features, including onboarding, dashboards, user modules, and sub-admin modules.
- * Implemented robust authentication and authorization using JWT and bcrypt.
- * Integrated Firebase for notifications, enhancing user engagement.
- * Utilized PostgreSQL for reliable data storage and management.
- * Ensured efficient backend functionality by leveraging Node.js and Express.js frameworks.
- * Maintained high code quality and adherence to coding standards throughout the development process.
