Profile Summary

Node.js Backend Developer with 1.5 + years of experience in designing and developing scalable, high-performance RESTful APIs and backend and authentication systems. Strong problem-solving, critical thinking, and attention to detail with hands-on experience in team collaboration, effective communication systems. Proficient in Node.js, Express.js, React.js, MongoDB, and MySQL, with expertise in API development, database optimization, and time management. Passionate about learning new technologies, adapting to new challenges, and delivering robust, secure, and efficient software solutions.

Technical Skills

- Backend Development: Node.js, Express.js, JavaScript, RESTful APIs.
- Frontend Basics: HTML, CSS, Bootstrap, React.js.
- Databases: MongoDB, MySQL.
- Developer Tools: VS Code, MongoDB Compass.

Education

B.Tech in Computer Science and Engineering

R.C. Patel Institute of Technology, Shirpur |
Current CGPA: 7.65

Aug 2019 – June 2023

Professional Experience

Appzia Technologies | Node.js Developer

Pune | January 2024 – Present

Project: 7Fife – Music Application

- Developed backend functionalities, managing 10,000+ songs, artists, and albums in the system.
- Designed and implemented a scalable backend infrastructure using React.js, Node.js, Express.js, and MongoDB.
- Integrated music upload and streaming logic, storing metadata and audio files securely using Multer and MongoDB.
- Implemented search and filter functionalities for music content based on artist, album, genre, and song name.

Project: Multi-Level Marketing (MLM) System

- Developed a multi-level marketing system supporting 5,000+ active users across 6 admin levels.
- Designed and implemented secure and scalable APIs for efficient data handling and seamless interaction between different user roles.
- Utilized MongoDB, Express.js, Mongoose, and Multer to manage hierarchical data structures effectively.
- Enhanced system security, reducing unauthorized access incidents by 80%.

Project: Voice Secretary App

- Developed a voice recording system that processed 10,000+ user voice notes monthly.
- Enabling users to record voice notes and set reminders using voice commands.
- Designed and optimized RESTful APIs to handle voice recordings, scheduling, and user preferences efficiently.
- Ensured data security and performance using Node.js, Express.js, and MongoDB, supporting real-time user interactions.
- Created a React.js-based Admin Panel for managing users, reviewing stored voice notes, and monitoring scheduled reminders.

Certifications

- Node.js Backend Development Internship – Appzia Technologies, Pune (June – 2023).
- Java Programming Internship – R3sys, Nashik (2022).
