State- Uttarakhand

## SUMMARY

I am a Node Js Developer with over 2 years of experience in building scalable web applications and crafting APIs. Proficient in technologies such as Express.js, NestJS, and MongoDB, with a focus on web3 development using Ethers.js. I bring strong problem-solving, communication, and teamwork skills to every project.

## PROJECTS

### NFTwist

A platform for creating and gifting NFTs.

- Pioneered a Web3 platform enabling effortless creation and gifting of NFTs.
- Utilized Ether.js and Infura for backend infrastructure.

### Stylup - Digital Closet Mobile App Project

An app for organizing a digital closet and planning outfits.

- Organized closet and suggested outfits based on various criteria.
- Tracked clothing usage for better outfit rotation.

### IMatch

A social platform for contests and interactions.

- Created a social platform for regular and competitive posts.
- Engaged users in live competitive showcases.

### Klaviss

A cutting-edge platform revolutionising property transactions in the US. Powered by AI for effortless document handling.

- It enables real-time property management and updates. Built on a scalable microservices architecture for optimal performance.
