## SUMMARY

A highly motivated and experienced Software Developer with a strong passion for technology and innovation. Proficient in Python, SQL, and JavaScript, with expertise in backend development, automation testing, and relational databases like PostgreSQL. Skilled in building scalable solutions and optimizing processes to deliver impactful results. Dedicated to continuous improvement, professional growth, and driving excellence in software development.

## WORK EXPERIENCE

### Edgeverve Systems Limited

Associate Product Developer

Dec 2022 - Feb 2024

- Developed and maintained scalable RESTful APIs using Node.js, Express.js and JavaScript ensuring seamless integration with backend systems and distributed architectures
- Designed and optimized relational database structures using PostgreSQL, enhancing query performance and data handling with 20% more efficiency.
- Integrated Kafka to build reliable and efficient message-driven architectures in distributed environments.
- Developed multilingual product features, expanding accessibility and usability for a global user base.
- Conducted automation testing using Mocha.js to ensure code quality, functionality and system stability.
- Managed version control and collaborative workflows using Git and GitHub, streamlining code deployment and reviews.
- Utilized Postman for API testing and deployed cloud solutions on AWS, ensuring performance, scalability and reliability.

## EDUCATION

### Bachelor's of Technology in Computer Science and Engineering

2017 - 2021

#### Lovely Professional University

- Specialization in Computer Science.
- CGPA - 6.67

### Intermediate Degree

2015 - 2017

#### Abhyas Junior College

- Relevant coursework in Mathematics and Science.
- CGPA - 9.7

## TECHNICAL SKILLS

- Programming Languages:** Python, JavaScript
- Backend Development:** Node.js, Express.js
- Databases:** PostgreSQL
- Distributed Systems & Messaging:** Kafka
- API Development:** RESTful API
- Automation Testing:** Mocha.js
- Version Control:** Git, GitHub
- Cloud Computing:** Amazon Web Services
- API Testing:** Postman
- Software Development Practices:** Agile, CI/CD, Data Structures & Algorithms, Object Oriented Programming
- Multilingual Application Development:** Building features supporting global accessibility

## PROJECTS

### Finacle (Fintech)

- Designed and developed robust and scalable RESTful APIs with multilingual capabilities, catering to a diverse range of global clients.
- Conducted comprehensive debugging and ensured high-quality code by implementing automation testing using Mocha.js.
- Developed and optimized key product features, focusing on high code efficiency and performance, while overseeing the deployment process to ensure smooth release cycles.
- Implemented complex SQL queries and optimized existing ones to ensure efficient data retrieval, significantly improving application performance and reducing query execution times.

### Fake News Detector

- Developed a robust fake news detection system using scikit-learn's Passive Aggressive Classifier, achieving high accuracy in identifying misleading content.
- Designed and implemented an intuitive GUI using PyQt, enabling seamless user interaction for uploading and analyzing news articles.
- Optimized the model pipeline for efficient real-time predictions, integrating pre-processing techniques to improve classifier performance.

## CERTIFICATIONS

- Python Course Completion** – Certified by **DataCamp**.
- Tableau Training** – Certified by **Skillslash**.
- Data Structures & Algorithms** – Certified by **Udemy**.
