WAPPZO INFOTECH PVT. LTD.

20th Jan. - 19th April. 2025

Backend Developer intern

Navsari, Gujarat

- Gained hands-on experience in **NodeJS and ExpressJs framework** to build **web application**.
- I built a OnePlaceEvent website using Node.js, Express.js, prisma (ORM), MongoDB, React.js

Projects

Clone Of Plan Your Tour Website | HTML, CSS

- Developed a clone web page of plan your tour using HTML and CSS

MedInsight | ReactJS,

- The platform that provides users with essential information about a curated list of medicines.
- The platform includes details such as the medicine name, image, uses, and description, helping users quickly access reliable information.
- The project was built using the React framework to deliver a responsive and user-friendly interface.

Clone Of E-Commerce website | ReactJs, Tailwind , API Integration

- It is built using ReactJS for its dynamic user interface and Tailwind CSS for styling.
- It showcases a variety of products with each item displayed alongside its image, name, price, and interactive buttons such as "Add to Cart" or "Remove."

OnePlaceEvent | NodeJs, ExpressJs, prisma, ReactJs, Tailwind

- Built a full-stack event service booking platform enabling event managers to create events and book required services, with real-time status tracking and admin panel management.
