## WORK EXPERIENCE

### Software Developer LeLafe IT Solution

03/2022 - Present

srinagar, india

#### Achievements/Tasks

- Developed customized software solutions for diverse clients, resulting in increased satisfaction and repeat business

## EDUCATION

### Study Program Master in Computer Application

05/2017 - 03/2021

Grade:76

### Study Program Institution/Place of Education

### Study Program Bachelors in Computer Application

04/2014 - 01/2017

## SKILLS

Javascript

Nodejs

MongoDB

Angular

HTMLCSS

Firebase

GIT

Docker

## PROJECTS

### Assessment APP (03/2023 - Present)

- Engineered a robust web application for organizations to manage and administer quizzes and assessments. Key features include:
- Quiz Management: Create quizzes with various question types (MCQ, single choice, rapid fire)
- Assessment Configuration: Configure, publish, and assign assessments to students and sub-organizations.
- Sub-Organization Management: Allow sub-organizations to assign parent organization assessments and create their own quizzes
- Group Management: Create groups and assign specific assessments to them.
- Assessment Administration: Capabilities to create, edit, and delete assessments.
- Media Handling: Secure media uploads via Firebase.
- Certificate Generation: Automated issuance of certificates for completed assessments.
- AI Integration: AI-powered generation of intermediate and hard-level questions.
- Secure Exam Environment: Safe Exam Browser for secure exam attempts and video proctoring for monitoring

### Training App: (07/2022 - 02/2023)

- Developed a comprehensive training application designed to streamline course management and student evaluation for instructors. Key functionalities include:
- Course Management: Easy uploading, configuration, and publishing of courses.
- Student Assignment: Assign courses to students, track progress, and evaluate performance with built-in assessments.
- Certification: Automated issuance of certificates upon course completion.
- Tech Stack:
- Node.js, MongoDB, Firebase, JWT Angular, Docker

### E-Renting System (03/2022 - 06/2022)

- This web App three different views on roles of user. Admin has full access where he could delete or edit landlord or tenant and could also delete or remove the rooms allowed by landlord

## CERTIFICATION

Javascript MongoDB,  
Full Professional Proficiency
