EXPERIENCE

Cognizant Technology Solutions   Aug 2022 – Present
E-Commerce Platform   *Noida, UP*

- Designed and developed an e-commerce application using microservices architecture, reducing query response time by 50% through a per-service database approach with MongoDB.
- Implemented authentication and authorization systems using JSON Web Tokens (JWT).
- Improved application performance through asynchronous inter-service communication.

Cognizant Technology Solutions
Fintech Application

- Developed a Node.js-based payment gateway system for seamless UPI transactions, ensuring secure and efficient financial operations.
- Designed a POS QR Payments system for secure, encrypted transactions using Node.js.
- Engineered a KYC- based Merchant Onboarding System, Improving registration and verification process.

CoreValue Technologies   Feb 2022 - July 2022
SDE Intern   *Remote*

- Developed and designed the React.js frontend for a performance tracking application, displaying employee ratings, reviews, and performance metrics.
- Built dynamic interfaces for seamless data visualization and improved user experience.
- Integrated APIs for real-time updates and collaborated with backend teams for optimized functionality.

PROJECTS

E-Commerce Platform (Microservices), Performance Insights Dashboard (React.js)

CERTIFICATIONS

- AWS Certified Cloud Practitioner
