WORK EXPERIENCE

Software Engineer

Vernost Marketing Technology Solution Pvt. Ltd. Mumbai

May 2020 - Present

Project : Axis Bank

- Implemented CMS functionality within the Axis project using MidOffice integration to streamline content management workflows.
- Developed and configured dynamic content modules to improve flexibility and reduce manual intervention.
- Collaborated with cross-functional teams to ensure seamless data exchange between the CMS and other enterprise systems via MidOffice APIs.
- Integrated AWS S3 for image uploads, enhancing multimedia content management.
- Increased SEO performance and page speed by implementing image lazy-loading.
- Managed AWS (S3) for storage and scalable deployments.
- Automated build and deployment with CI/CD pipelines using Jenkins, achieving seamless software delivery.
- Enhanced security by developing robust authentication and authorization features.
- optimized database queries, ensuring high performance under load and a smooth user experience across all modules.

Project : TATA Digital

- Crafted an aesthetically pleasing dashboard with an intuitive graph design for enhanced user experience.
- Implemented robust data encryption and decryption mechanisms to safeguard sensitive information.
- Developed a feature-rich reports section with seamless listing and download functionality.
- Established a secure password reset functionality to enhance user account security.
- Implemented rigorous Vulnerability Assessment and Penetration Testing (VAPT) measures to fortify system security.

Project : Vernost Pay

- Successfully established seamless connectivity between frontend and backend in the project setup.
- Implemented custom API calls and integrated a validation file for ensuring data accuracy and integrity.
- Developed a dynamic form in Angular to enhance user input flexibility and improve the overall experience.
- Created a standardized email template for system-generated emails, ensuring a professional and consistent communication format.

Internship

Vernost Marketing Technology Solution Pvt. Ltd. Mumbai

Feb 2020 - Apr 2020

Project : Rainbow Rewards

- Addressed and resolved UI functionality bugs, ensuring a smooth and error-free user interface experience.
- Developed robust service and middleware APIs in NodeJS to facilitate seamless communication and data handling.
- Created modular functionalities, including Add, Edit, and List, to enhance system modularity and user interaction.
- Implemented user role access controls to regulate and manage user permissions for enhanced security.
- Established a Login Report feature with customizable filters to provide detailed insights into user login activities.
- Implemented a Transaction Report feature with configurable filters, offering comprehensive visibility into system transactions.
