Objective

Highly motivated Node.js Backend Developer with 3.6+ years of experience specializing in scalable microservices, robust RESTful API development, and seamless payment integrations. Adept at leading teams and optimizing system performance, I bring a proven track record of delivering smooth, efficient backend solutions in dynamic environments. Seeking to leverage technical expertise and leadership skills to drive innovation and success in your organization.

Skills

- JavaScript, NodeJs, Typescript, ExpressJs, Java
- MVC Architecture, REST Api, Project Management
- Docker, kubernetes, Kafka, RabbitMq, Radis, Elastic search
- MySQL, Postgres, Mongodb

Experience

75 technology   9 August, 2021 - 20 March, 2023
Software developer
Developed and maintained RESTful APIs using Node.js for various client projects.

Integrated multiple payment gateways to enable secure and seamless transactions.

Implemented email services using Nodemailer for automated notifications and communication workflows.

Utilized Elasticsearch to optimize data retrieval and enable fast, efficient search functionalities.

Collaborated with frontend teams and other backend services in a microservices architecture to deliver end-to-end solutions.

Ensured code quality and performance optimization through best practices and regular code reviews.

Gammastack (IGaming, Casino)   18 April, 2023 - 4 october, 2024
Solution Engineer
Developed and integrated casino and slot gaming platforms, ensuring seamless gameplay experiences.

Implemented third-party Casino and Sportsbook integrations for real-time gaming operations.

Integrated multiple payment gateways, including PayPal, to support global transactions.

Managed and optimized transaction APIs, enhancing reliability and processing speed.

Improved system efficiency by streamlining backend processes and optimizing API performance.

Collaborated with cross-functional teams to deliver high-performance, scalable gaming solutions.

Immortal Varta   15 December, 2023 -
NodeJs Developer
Leading the backend development team, ensuring strong system architecture and high code quality.

Designed and implemented robust backend architecture to support scalable and maintainable applications.

Integrated Socket.io for real-time communication, enhancing user engagement and system responsiveness.

Leveraged Node Bull with Redis to build an efficient and reliable messaging and job queue system.

Provided technical guidance, code reviews, and mentorship to the development team.

Collaborated closely with cross-functional teams to deliver end-to-end solutions aligned with business goals.

Projects

- **Talkndheal (Astrology)**
  Led the backend development team, architecting scalable solutions and ensuring high-quality code across projects.

  Designed and implemented real-time communication features using Socket.io, significantly enhancing system responsiveness.

  Integrated Node Bull with Redis to optimize job queues and messaging systems.

  Provided technical leadership through code reviews, mentorship, and cross-team collaboration to deliver robust end-to-end solutions.

- **Decues**
  Developed casino and slot gaming modules with a focus on delivering a seamless user experience.

  Designed a robust, atomic transaction system ensuring data consistency across complex operations.

  Optimized challenging Sequelize queries for rapid API response times.

  Employed Kafka for real-time messaging, managing high-throughput communication efficiently.

- **Tv2 (online video streaming)**
  Developed and maintained RESTful APIs using Node.js to support various client projects.

  Integrated secure payment gateways and implemented Nodemailer for automated email communication.

  Leveraged Elasticsearch to enhance data retrieval and search performance.

  Collaborated closely with frontend teams in a microservices environment to deliver end-to-end solutions.

Education
