- English

Profile Summary

As a seasoned Node.js Developer, I bring 2 years of experience in designing databases, building RESTful APIs, and crafting server-side logic. Proficient in TypeScript for backend development, I excel in rigorous testing of RESTful APIs to ensure superior delivery. With a track record of deploying code, optimizing performance, and implementing security measures, I am committed to collaborative teamwork and excelling in shared workspace environments.

Education

B.Tech/B.E., 2021

Jawaharlal nehru college of Engineering

12th, 2013

Maharashtra, English

10th, 2013

Maharashtra, Marathi

Work Experience

Oct 2022 - Present

Software Developer

Subcodevs IT Consulting and solution

1. Designing databases, building RESTful APIs, and crafting server-side logic. 2. Deploying code, optimizing performance, and implementing security measures 3. Troubleshooting and debugging issues, collaborating with cross-functional teams. 4. Continuous learning and maintaining comprehensive documentation

Projects

335 Days

XLit

Xlit is about searching for a nearby nightclub. The technical stack of the project is Flutter for frontend, nests & postgres used for backend server. also, we used Google API to fetch nightclubs using user location.
