## PROJECTS

### EXPENSE TRACKER

Created an expense tracker where a user can signup and login, add and remove expenses.

- Built using HTML, CSS & JavaScript and integrated NodeJS & ExpressJS Framework with Sequelize.
- Added report generation feature for premium users.
- Added authentication for the user using JWT token.
- Used bcrypt library for encryption to store passwords in the database
- Integrated Razorpay payment gateway.
- <https://github.com/Muskanbalaiwar/deployment-repo>

### Group Chat Application

Created a group chat application where users can login and send and receive messages

- Designed the schema for chats, users, and groups and set up associations between them.
- Followed MVC(Model View Controller) pattern.
- Users can create and delete multiple groups.
- Implemented admin feature for the group user who can add and remove users.
- Users can make other users admin and give them admin features.
