WORK EXPERIENCE

FullStack Developer

Eduminds Learning

Noida

09/2024 - present
Achievements/Tasks

- Developed and maintained dynamic full-stack web applications using Angular/React for frontend and Node.js with Express for backend..
- Integrated and optimized MongoDB/PostgreSQL databases using Mongoose/Sequelize.
- RESTful APIs and real-time features using AWS services.
- secure authentication and authorization flows using JWT and middleware

Mean Full-Stack Developer

Ezimax Technologies Pvt. Ltd

Noida

10/2023 - 08/24
Achievements/Tasks

- Worked as a full-stack developer with a primary focus on backend development using Node.js, Express.js, and MongoDB.
- A full-fledged e-commerce platform with user authentication, product management, and order tracking.
- A Learning Management System (LMS) with role-based access for admins, teachers, and students. Implemented JWT authentication
- A custom CRM system for managing leads, tasks, and customer interactions.
- Developed reusable Angular components and integrated RxJS for handling reactive data streams.
- Used Redis for caching used data, improving API performance and times.
- Ensured code quality and consistency using Git, collaborated with team members via Jira, and participated in sprint planning and daily standups.
- Followed MVC and service-based backend architecture, focusing on clean code and maintainability.

Mean/Mern Developer

KENT Cam/Kent RO Systems

Noida

07/2022 - 09/2023
Achievements/Tasks

Initially joined as an Angular Developer, building responsive UI components and integrating REST APIs for enterprise-level web applications.

- Transitioned into a backend role within a few months, gaining hands-on experience with Node.js, Express.js, and PostgreSQL using Sequelize ORM.
 - Developed RESTful APIs for various modules such as user management, product catalog, and admin dashboards.
 - Implemented real-time communication features using WebSockets and AWS Lambda for serverless logic execution.
 - Integrated AWS S3 for storing and retrieving media files securely.
 - Designed and built frontend for data management systems, handling large data sets with filters, pagination, and sorting.
 - Worked on payment gateway integration and built secure APIs for handling payment status and transactions.
- Followed agile practices using Git and Jira for task tracking and collaboration.

PERSONAL PROJECTS

Learning Management System (LMS).

- Developed teacher-student dashboards with content loading.
- Used forms with custom validation for course and enrollment.
- Integrated JWT-based authentication and protected routes.
- Developed teacher-student dashboards with dynamic loading.
- Used forms with custom validation for course and enrollment.
- Integrated JWT-based authentication and protected routes.
- Developed a robust backend using Node.js and Express with JWT-based multi-role authentication.
- Managed MongoDB collections with nested schemas and aggregation queries for analytics.
- Created dynamic routing and modular services to handle admin, teacher, and student flows.
- PostgreSQL to manage billing and history with complex join queries.

E-commerce Platform

- Developed responsive UI using Angular and Angular Material.
- Integrated cart, product listing, and payment gateway features.
- Built complete product and order management REST APIs.
- Implemented secure admin login, dynamic product filtering, and payment status updates.
- Used Redis for caching product data and improved response time by over 40%.
- Used RxJS to manage asynchronous data streams effectively.
- Implemented lazy loading to improve performance and load time.

IoT Device Activity Platform

- Processed and saved real-time hex packets from IoT devices.
- Used MongoDB for device history and implemented cron jobs for scheduled tasks.

Data Management System(DMS) where we manage data of all the clients.

- Developed RESTful APIs using Node.js and Express.js to handle CRUD operations, user authentication, and data filtering.
- Designed and optimized PostgreSQL database schemas to support dynamic data structures, indexes, and relational queries.
- Integrated Sequelize ORM for database interaction, including complex joins, validations, and model associations.
- Implemented role-based access control (RBAC) to manage user permissions and secure endpoints.

ACHIEVEMENTS

Certified in SQL and Linux training from IIT Bombay organized at JSSATE Noida.

Got the 1ST position in beat the weight competition held in JSSATE Noida.

Got Two promotions in one year in the Previous company (KENT Cam).
