Having two years of experience as a Node.js developer, I have honed my skills in crafting robust and scalable server-side solutions. Proficient in leveraging frameworks like Express.js and databases like MongoDB, I excel in designing and implementing efficient RESTful APIs. My expertise extends to optimizing performance, ensuring security, and collaborating seamlessly within agile development teams to deliver high-quality software solutions tailored to meet client needs.

Skills

Programming Languages
Javascript, Typescript, HTML/CSS, Python, SQL

Databases
postgreSql, MongoDB

Frameworks
Express.Js, React Native, React.js

Tools
Git, Github

Cloud services
AWS, Azure

Professional Experience

Real Variable, *Full Stack Developer*   07/2024 – present
Real Ware   Hyderabad
  - Designed and implemented the Restful APis.
  - Designed and implemented the workFlow service which is used by
    business people to orchestrate the flow.
  - worked on Azure Blob storage.
  - Fixed existing bugs and stabilized the app.
  - Collaborated with the front-end development team for integration.
  - Conducted code reviews, debugging, and troubleshooting for high-
    quality software delivery.

Sixpep Technovations

Full stack Developer   01/2024 – 06/2024
Run Exchange   Hyderabad
  - Developed a web application using React.
  - As a full stack developer Designed, implemented and Integrated
    those Restful APIs to fetch and display dynamic content, ensuring
    real-time data updates within the application.
  - Integrated push notification services using Firebase.
  - Implemented real-time communication features using Socket.io to
    enable seamless and responsive interactions.
  - Worked on AWS services like EC2, S3, Route53.

- Collaborated closely with UI/UX designers to ensure pixel-perfect implementation of designs, enhancing user experience and satisfaction.
- Participated in code reviews and contributed to team discussions fostering a collaborative development environment.

Node.Js Backend developer   08/2022 – 12/2023
CryptoCricket   Hyderabad
- Developed and maintained robust backend systems using Node.js to handle server-side logic, APIs, and data integration.
- Designed and implemented of RESTful APIs to enable seamless communication between the front-end and backend systems.
- Leveraged MongoDB for efficient data storage and retrieval.
- Implemented authentication and authorization mechanisms using JWT.
- Integrated various third-party services and APIs (email services, web3).
- Collaborated with the front-end development team for integration.
- Conducted code reviews, debugging, and troubleshooting for highquality software delivery.
- worked on AWS services like EC2, S3, Route53

Education

Icfai University   08/2019 – 06/2023
Bachelor of Technology in computer science with a cgpa of **7.55**   Hyderabad
