Familiar: Rest API, Redux, Excel

Experience

Associate Software Engineer   **April 2024 – present**
Gurugram, Haryana
- Developed and maintained web applications using Angular, Node.js, and MongoDB.
- Optimized backend APIs and MongoDB queries, resulting in improvement in page load performance and overall responsiveness.
- Collaborated with cross-functional teams including designers, testers, and product managers to deliver scalable features aligned with client requirements and timelines.
- Participated in code reviews, debugging, and documentation to ensure high-quality code and maintainable solutions.

Web Developer   **May 2023 – August 2023**
Ahmedabad, Gujarat
- Utilized HTML, CSS, and JavaScript to create 50+ responsive web pages for both company and client .
- Implemented front-end technical solutions to meet project requirements for creation of a ecommerce website.
- Explored ways to visualize and send a daily report of test results to team members using HTML, JavaScript, and CSS.

Projects

pizzeria | GitHub: Source Code   **June 2024**
- Designed a responsive UI using Angular with components, routing, and reactive forms to let users browse pizzas, customize toppings, and place orders in real-time.
- Developed RESTful APIs with Node.js and Express to manage pizzas, toppings, orders, and dynamic pricing based on selected ingredients.
- Designed MongoDB data models for pizzas, toppings, and orders, with CRUD operations to manage items and track order history.
- Implemented order confirmation, real-time ingredient updates, and modular architecture for scalability and maintainability.

Certifications

- **Web Development** by Pie Infocomm Pvt. Ltd.   **2022**
- **Web Development using HTML, CSS and JavaScript** by Michigan University   **2021**
- **Python** by Internshala   **2020**
