SUMMARY

I am Dhruvesh Rana, a skilled MERN stack and React Native developer specializing in web and mobile applications. With expertise in front-end development, I create intuitive, high-performance user experiences. Currently at Aakash Infoway Ltd., I am passionate about innovation and excellence in software development

EXPERIENCE

Software Developer
Groovy Web Tec Ltd., Nadiad
Jun-2023 to Dec-2024

- Developed and maintained web and mobile applications using the MERN stack, React.js, and React Native, focusing on responsive and optimized user interfaces.

- Collaborated closely with cross-functional teams to translate business requirements into functional applications, enhancing user experiences through clean and efficient code.

- Spearheaded front-end development initiatives for various projects, ensuring compatibility and responsiveness across devices for both web and mobile platforms.

- Leveraged advanced knowledge of React Native to build high-performing mobile applications, optimizing features for smooth performance and intuitive user experiences.

PROJECTS

Reanlo – Book-Centric Social Media Platform
Role: Junior Developer (Groovy Web)
Technologies: React Native, Redux, REST API

- Reanlo is a mobile application tailored for book enthusiasts, combining social media functionality with a passion for reading. Similar to Instagram, it enables users to share book reviews, engage in discussions, and track their reading progress. Features include a detailed book information page, discover section, notifications, and an admin panel for content management. Reanlo allows users to follow authors and readers, fostering a vibrant community around book-related content.

Business Maintenance – Billing and Customer Management Platform
Role: Sole Developer (Groovy Web)
Technologies: React, Redux, Firebase

- Business Maintenance is a web application designed to streamline business operations, including billing, customer, and dealer management. It allows users to create dynamic bills, manage customer and product data, and track transactions effectively. Key features include a View Bill section to monitor pending and cleared amounts, a dealer section for tracking incoming goods, and an intuitive interface for managing daily business tasks. This app enhances operational efficiency by securely storing all data and providing comprehensive tools for accurate financial tracking.

Retail Shop Management – Inventory and Sales Tracking System
Role: Sole Developer (Aakash Infoway)
Technologies: React, Redux, MongoDB

- A web application designed for retail shops to manage inventory, sales, and customer transactions efficiently. It features dynamic billing, stock tracking, and a sales report system, ensuring smooth business operations with real-time data updates and secure storage.

Restaurant Web App – Online Ordering & Management System
Role: Sole Developer (Aakash Infoway)
Technologies: React, Redux, MongoDB

- A restaurant management web app enabling online ordering, table reservations, and menu management. It includes real-time order tracking, billing, and customer management, streamlining restaurant operations for improved efficiency and customer experience.

LANGUAGE

English , Hindi , Gujrati

EDUCATION

Master of Computer Applications (MCA)
Charotar University of Science and Technology (CHARUSAT)
Completed in 2024

Gained advanced expertise in software development, data structures, and application design, with a focus on front-end technologies and mobile application development. Developed strong problem-solving skills through hands-on projects and practical coursework.

SKILLS

Programing Language:-
    JavaScript   C   Java   C++   Html   CSS

Project Management:-
    Trello   JIRA

Frameworks & Libraries:-
    React.js   React Native   Redux

Backend & APIs:-
    REST API -   Firebase   Node js   Express js

Other Skills
    Manual Testing
