PROJECTS:

NIPPON INDIA MUTUAL FUND (Investor App):

It's an existing app of Nippon India (Investor App). I have implemented the Adobe AEP Target SDK. There are many use cases as requirements from Nippon, and we need to implement on-click and on-dismiss events for these use cases.

Technology : React Native, Type Script, Redux Toolkit

UNION BANK OF INDIA (UBI):

I worked on the UBI Mobile Banking app for users. On this app, I focused on the Public Provident Fund (PPF), Sukanya Samriddhi Yojana (SSY), Recurring Deposit (RD), and Fixed Deposit (FD) module flows, as well as the Login and Registration module flows.

Role & Responsibility:

API Integration and manage state using Redux toolkit.

Creating mobile app UI Design and writing code coverage.

Overseeing, training or advising team member.

Technology : React Native, Type Script, Redux Toolkit

NEXT DOOR RENTAL (NDR):

NDR app is like OLX type service-based app. In this app have a two side users Renter and Vendor. Vendor user upload the product on app for rent purpose so renter user can see that product details on the app. Renter user can booked that product for rent purpose only after using the product renter return that product to the vendor. Renter user can give a review to that product after used. In the app we implemented Stripe Payment Gateway, One to One Chat and Xero account for creating invoice.

Role & Responsibility:

API Integration and manage state as global.

Fix bugs and performance bottlenecks for performance that feel native.

Deploy build on play store and app store.

Overseeing, training or advising team member.

Technology : React Native, Type Script, React Redux

LIFTOUT TIMESHEET:

Liftout Timesheet app basically manage the time sheet of employee. Liftout app publicly for the UK location. On this app employee enter check In, checkout time of working days. Using this app employee can apply for leave, travelling time etc. this app maintains proper working timesheet of company employee.

Role & Responsibility:

Build app and UI components from prototypes and wireframes. Design and implement UI components for JavaScript based web and mobile app using react ecosystem. API Integration and manage state as global. Fix bugs and performance bottlenecks for performance that feel native. Deploy app on play store and app store.

Technology : React Native, Type Script

Link: <https://play.google.com/store/apps/details?id=com.liftout&pli=1>

PARTWK APP:

Partwk App basically for book reading and listening app. On this app user can read and listen the audio of books also user can give a rating to the books. On this app some books free for reading and listing. We are implemented Stripe payment gateway for a subscription package.

Role & Responsibility:

Build app and UI components from prototypes and wireframes. Design and implement UI components for JavaScript based web and mobile app using react ecosystem.

Technology : Flutter, Dart

Link: <https://play.google.com/store/apps/details?id=com.partwk.app>

FRECYCLE APP / WEB ADMIN PANEL:

It is a London Based App. On this app user can recycle our unused products than user received rewards. Firstly, user enter number of recycle products then enter location after that user request for received order then recycle van collect those products from user location. After that user received rewards. On this App Implemented London MAP and Strip Payment Gateway.

Role & Responsibility:

Build app and UI components from prototypes and wireframes. Design and implement UI components for JavaScript based web and mobile app using react ecosystem. API Integration and manage state as global. Fix bugs and performance bottlenecks for performance that feel native. Deploy build on play store and app store.

Platform/Technology used : React Native, Java Script, React js

Link: <https://frecycle.uk/> (Note: App will not publish now because some frecycle privacy policy issues)

AUNTY SG APP (Childcare on Demand):

It's Singapore Based Project. In this Project have a Two Side. One is Parent Side and another is Sitter Side. Parent user can book Sitter for Child Care. For Booking Parent User create a job for Sitter. Sitter can see all jobs list and can select and confirmed to Parent. Parent and Sitter can chat on the app. After Confirmed the Booking sitter Provide a service after completed the service Parent pay amount to Sitter also Parent can review to Sitter.

Role & Responsibility:

Build app and UI components from prototypes and wireframes. Design and implement UI components for JavaScript based web and mobile app using react ecosystem. API Integration and manage state as global. Fix bugs and performance bottlenecks for performance that feel native.

Technology : React Native, Java Script

App Link : <https://apps.apple.com/in/app/id1586583471>

<https://play.google.com/store/apps/datasafety?id=sg.aunty.v2>

FOOD PAY APP:

On this app user can check nearest food Restaurant and Grocery Store then user can order our Foods. On Food pay App Show Restaurant Food Menu with Proper Restaurant Review. User can select delicious food then proceed to pay amount after that order booked for delivery to user location. On Food pay app implemented Payment Gateway and Google Map location for access user current location.

Role & Responsibility:

Build app and UI components from prototypes and wireframes.
Design and implement UI components for JavaScript based web and mobile app using react ecosystem.
API Integration and manage state as global.
Fix bugs and performance bottlenecks for performance that feel native.
Deploy build on play store and app store.

Technology : React Native, Java Script

App Link: <https://play.google.com/store/apps/details?id=com.foodpay>

INFO GURUKUL:

It's a basic Online Education Platform. On this App have a Multi Course. User Can Check Demo Course and User can Purchase Courses. After Completion of Course user Gotten Certificate of course. In the App Payment Gat way Integrated.

Role & Responsibility:

Web and App design and implement UI components for JavaScript based web and mobile app using react ecosystem. API Integration and manage state as global.
Fix bugs and performance bottlenecks for performance that feel native.

Technology : React Js/Native, Java Script

App Link: <https://play.google.com/store/apps/details?id=com.infogurukulapp&hl=en>

MY ASTROLOGY GURU APP:

My Astrology Guru is a Platform where you can get in touch with all expert astrologers. In This Project show the kundli details.

Users can generate and match a kundli for wedding. I worked as frontend Layout Implementation and API Integration. In this App used a React Native Technology.

Technology : React Js, Bootstrap, CSS

BRAND ON RUN:

On this Project show the Branded Product Details on the Website after that user can check all Branded Product Details. If user want then user can purchase a product. User can like and unlike a product also user can add product in shopping bag. The objective of this live project is to provide categorized details about various companies at one place I worked as a web Designer by using Bootstrap, PHP, CSS and HTML.
