EDUCATION

Master Of Computer Application	2025
Bachelor Of Computer Application	2022
Diploma Software Engineer	2019

SKILLS

- JavaScript (ES6+)
- Nodejs
- Express and Nest.js Framework
- RDBMS(Mysql),TypeOrm,Sequelize
- NoSql(Mongodb, Redis),
- Postgres Prisma ORM
- Data Structure (Basic)
- HTML5 & CSS3
- BootStrap, Material UI
- Reactjs
- Redux
- Git Deployment: Heroku, Netlify
- AWS Service
- TypeScript
- RestApi
- Graphql

PROFILE

I am **Full Stack Developer** having proficiency more towards the backend side. with having **total of 4 years** of experience providing high-impact web solutions for diverse industry organizations. Skilled in developing, and testing multiple web-based applications incorporating a range of technologies. Aspiring to combine broad background with strong technical skills.

WORK EXPERIENCE

Cimet
Role:- Full Stack Developer   Dec 2024 - Present

- Implemented SaaS solutions to provide a seamless, subscription-based experience for users.
- Worked with **GraphQL and Reactjs** to design flexible and efficient APIs for improved data fetching and management.
- Built and integrated back-end services with **PostgreSQL** for robust and scalable database management.
- Developed **microservices** to ensure **modular, maintainable, and scalable** application architecture.
- Collaborated with cross-functional teams to deliver new features, ensuring timely project delivery using Agile methodologies.

Hatchlong Tech Pvt.Ltd
Role:- Senior Software Developer   Apr 2024 - Aug 2024

- Developed, and maintained software applications using **Node.js, Reactjs, JavaScript, MongoDB, and MySQL ORM (Sequelize).**
- Led the development of an e-commerce platform with **integrated payment gateway** solutions**.**
- Developed and implemented **ERP (Enterprise Resource Planning) systems for efficient resource management across departments.**
- **Built CRM (Customer Relationship Management)** applications to streamline customer interactions and data.
- Contributed to modules for employee management, workplace safety, and billing processes.

Elite Mindz Pvt.Ltd
Role:- Software Developer   Apr 2021 - Mar 2024

- Spearheaded full-stack development using **Node.js, JavaScript,Reactjs, MongoDB, and MySQL ORM** (Sequelize) across multiple projects.
- Engineered and enhanced e-commerce platforms with integrated payment gateways, enabling secure and seamless transactions.
- Designed and implemented comprehensive **ERP (Enterprise Resource Planning)** systems to optimize resource allocation and business operations.
- Developed **CRM (Customer Relationship Management)** applications to improve customer engagement and data handling.
- Built and maintained modules for employee management, workplace safety, and billing systems, ensuring operational efficiency.

SellTm (SnapDeal)
Role:- Software Web Developer   Nov 2019 - June 2020

- Developed web applications using Node.js, Python, and MySQL, contributing to the backend architecture of various projects. Implemented Selenium for
- automation tasks, streamlining data scraping and testing processes. Integrated multiple third-party APIs to enhance e-commerce functionality, including features
- such as recharge services. Developed solutions for secure data storage and management using MySQL to ensure efficient transaction handling and data
- integrity.

PROJECTS

HRMS-ERP (code)

- **Employee Management**: Designed and developed modules for employee onboarding, records management, and performance tracking to streamline HR operations.
- **Payroll Processing**: Automated payroll calculations, tax deductions, and salary disbursements to ensure accuracy and compliance.
- **Leave and Attendance Management**: Integrated systems for leave requests, attendance tracking, and shift scheduling, improving workforce management and scheduling efficiency.
- **Training and Development**: Built modules for employee training programs, tracking certifications, and monitoring skills development, enhancing employee growth and compliance tracking.

Insurance-CRM-Policy (code)

- **Policy Management**: Developed modules for policy creation, updates, renewals, and compliance tracking, ensuring efficient management of insurance policies.
- **Customer Interaction**: Integrated multi-channel communication tools (email, SMS, chat) to enhance customer engagement and provide seamless support.
- **System Integration**: Facilitated smooth integration with existing ERP and financial systems, ensuring scalability and supporting third-party API integrations for expanded functionality.

DQS-ERP-India (code)

- **Role Management**: Designed and implemented role-based access control within the HRMS, ensuring secure and efficient management of user permissions and roles. **Learning Management System** (**LMS**): Integrated Udemy course functionality to support online training and development, enhancing learning opportunities for employees. **Finance & Accounting**: Developed modules for financial management and accounting, streamlining financial processes and reporting. **Expense Management**: Implemented Zoho CRM integration for expense management, including third-party API integrations to track and manage expenses efficiently. **Channel Partner & Sales Marketing**: Developed features for channel partner management and sales marketing, supporting effective marketing strategies and partner collaboration.

Sankalp-E-commerce (code)

- **E-Commerce Platform**: Developed an e-commerce system specializing in seeds and agricultural products for farmers, featuring comprehensive shopping functionalities. **Order Management**: Implemented features for adding orders to the cart and processing transactions through the CC Avenue payment gateway.
- **Integration**: Utilized GoFrugal third-party service APIs for enhanced service integration and operational efficiency. **Notifications**: Incorporated Firebase for real-time notifications and updates to enhance user engagement. **Shop and Role Management**: Designed and implemented shop management and role-based access control to streamline administrative tasks and user management.

Saif-Lanes (code)

- **Employee Safety Management**: Developed and implemented a system focused on ensuring employee safety within the ship and port management ecosystem.
- **Role Management**: Designed role-based access control to manage and restrict user permissions effectively within the safety and management system.
- **Document Management**: Integrated the Solr tool for advanced document searching capabilities, utilizing various searching phases to improve document retrieval and management efficiency.

SellTm E-commerce App (code)

- **Product Management**: Developed an e-commerce website with comprehensive features for product insertion and management, supporting various product categories.
- **Shopping Features**: Implemented functionality for add to cart, wishlist management, and online shopping to enhance the user experience.
- **Payment Integration**: Integrated a payment gateway for secure online transactions and recharge API for seamless payment processing.
