

# Deepak Singh

Fullstack Developer

## PROFILE SUMMARY

I'm a React.js developer with 3.5 years of experience. Over the years, I've built 15 fast, scalable, and user-friendly interfaces for a variety of applications using React. I focus on writing clean, maintainable code, optimizing performance, and collaborating effectively with teams. I'm passionate about staying up to date with new technologies and enjoy solving complex problems—always striving to take projects to the next level. I'm an immediate joiner and ready to contribute from day one.

## EDUCATION

- 2019

B.Tech/B.E.  
World college of technology and management
- 2015

XIIth  
English
- 2013

Xth  
English

## WORK EXPERIENCE

- Jul 2024 - Apr 2025

Fullstack Developer  
Avinya Techsoft Pvt. Ltd.  
Developed reusable UI templates to accelerate feature development and maintain design consistency, while optimizing state management to improve app performance and reduce load times by 30%.
- Sep 2022 - May 2024

Sr. Frontend Developer  
redgrape technology pvt. ltd  
Developed a dynamic, high-performance, and responsive dashboard using React.js and Next.js with server-side rendering (SSR), integrating multiple RESTful APIs for real-time data, visualizations for interactive insights, and secure user authentication with role-based access control.
- Oct 2021 - Aug 2022

React Developer  
Oodles Technology Pvt Ltd  
Integrated WebRTC and Socket.io for real-time, high-quality video/audio communication with robust session management, while leveraging React.js and Redux to build a dynamic, scalable UI and ensure consistent state management across the application.

Projects

10 Months

COMMUNICATION SCAFFOLD

Communication Scaffold is a video calling project built with React.js, featuring video calling, message transfer, and meeting participation. It leverages WebRTC for peer-to-peer communication and Socket.io for real-time messaging, enabling seamless, interactive communication. With high-quality video and audio, instant messaging, and easy meeting access, it provides users with a smooth and engaging communication experience.

3 Months

DG Market

The dgMarket project , built with React.js, is a global e-procurement platform that offers real-time access to public sector tenders, contracts, and procurement opportunities. It streamlines the bidding process, enhances transparency, and provides a dynamic, responsive user interface for improved accessibility and efficiency.

9 Months

Client Project

This Project is an intelligent SaaS platform designed to transform how audit and assurance services are delivered, particularly for small and mid-sized accounting firms. The platform provides a modern, end-to-end solution for managing audit engagements with features such as guided workflows, real-time client collaboration, and seamless financial data integration.

As a React.js Developer, I contributed to developing and optimizing key UI components, ensuring responsiveness and scalability across devices. I integrated third-party APIs like Validis for real-time data ingestion and Confirmation for audit confirmation workflows. I collaborated closely with UX designers and backend developers to deliver intuitive and efficient user experiences. My focus was on clean code practices, performance optimization, and implementing secure, scalable frontend architecture.
