

Mayank Bankoti

Software Developer

28/12/1997

Skills

 React Native
 ReactJS
 Redux
 Javascript
 Fastlane
 Typescript
 Nativewind

 HTML
 Appcenter
 Node JS
 CSS
 Directus

Professional Experience

Software Engineer, *Landis+Gyr*

06/2024 - present

- Developed and maintained cross-platform mobile application using React Native.
- Integrated RESTful APIs and managed data flow using Redux and React Query.
- Implemented unit testing using Jest and React Native Testing Library to ensure code reliability and coverage.
- Utilized Fastlane to automate app deployment and manage multiple white-label builds efficiently.
- Worked closely with product and design teams to deliver seamless UI changes and ensure pixel-perfect implementation.
- Actively participated in code reviews, improving code quality and consistency across the team.

Software Engineer, *Netprophets Cyberworks Pvt. Ltd.* (1.6 years)

03/2023 - 06/2024

- Led the development of mobile applications using React Native, delivering highquality products that met client specifications and requirements
- Implemented and optimized features for Android platforms, resulting in improvement in app performance.
- Worked closely with UX/UI designers to ensure the seamless integration of design elements and interactive components
- Collaborating with backend developers, I contributed to establishing efficient communication between the front-end and back-end systems, while also actively engaging in Node.js development.

Senior System Engineer, *Infosys Limited (2.6 years)*

- 10/2020 03/2023
- Spearheaded the development of web applications using React.js, contributing to a seamless user interface and enhanced user experience
- Successfully implemented and maintained front-end components, ensuring optimal performance and responsiveness.
- Integrated third-party APIs to enhance application functionality and streamline data exchange processes.
- Actively participated in code reviews, providing constructive feedback to team members and maintaining code quality standards.

Projects

True energy 🛮

06/2024 - present

- Developed an app using React Native framework, delivering a seamless user experience on both iOS and Android platforms.
- Utilized Context API, async storage and redux for state management, ensuring efficient data flow throughout the application.
- Integrated RESTful APIs and managed data flow using Redux and React Query.
- Implemented unit testing using Jest and React Native Testing Library to ensure code reliability and coverage.
- Utilized Fastlane to automate app deployment and manage multiple white-label builds efficiently.

Candidate Mobile App

11/2023 - present

- Developed an app using React Native framework, delivering a seamless user experience on both iOS and Android platforms.
- Utilized Context API, async storage and redux for state management, ensuring efficient data flow throughout the application.
- Integrated Hero Icons for intuitive and visually appealing iconography, enhancing the app's design and usability.
- Implemented React Native Navigation for smooth navigation between screens, optimizing user interaction.
- Collaborated with a cross-functional team of designers and backend developers to integrate APIs in node JS domain and ensure the app's functionality aligned with project requirements.
- Actively participated in code reviews and provided constructive feedback to team members, fostering a collaborative and learning-focused environment

Help Desk App

05/2023 - 11/2023

- Developed and implemented the front-end of the Help Desk app using React Native, resulting in a user-friendly interface
- Utilized Redux for state management, ensuring a consistent and responsive application across various screen sizes and devices.
- Integrated with RESTful APIs to facilitate communication between the mobile app and the server, enabling real-time updates and data synchronization.

Ecounselling App

03/2023 - 05/2023

- Developed mobile applications using React Native and JavaScript, resulting in improved user experience and increased engagement
- Stayed updated with industry trends and implemented best practices to optimize code efficiency.

- · Conducted thorough testing and debugging, ensuring smooth performance and high-quality deliverables. Stayed updated with industry trends and implemented best practices to optimize code efficiency.
- Fixed various bugs on UI and worked with CSS part.

PJMXP - Data Forecasting

11/2021 - present

- Developed and implemented the front-end of the PJMX Forecasting system using React. is, creating a responsive and intuitive user interface for project managers and stakeholders.
- Utilized Redux for state management, enabling real-time updates and synchronization of project data across multiple users.
- Integrated data visualization components using Chart.js, providing graphical representations of project timelines, resource allocation, and financial forecasts.
- Actively participated in code reviews with seniors and provided constructive feedback to enhance the overall quality of codebase
- Stayed updated with the latest trends and technologies in web development, continuously enhancing skills in React JS, JavaScript, CSS, and HTML.

Braavos- Contracted Management System

- Its is an end-to-end application development project involving Core Engineering activities like requirement gatherings, solution design, build, testing, implementation and support.
- Worked on multiple user stories such as test data set up for multiple requirements.

Travel Away - Holiday Package Booking Site

12/2020 - 01/2020

- It is a booking website using full stack Dot Net Technology with angular framework for UI portion.
- · Worked on user stories and Enhancement such as creating Login page for administration and customer.
- Generated sample database for project using MS SQL
