Results-driven Node.js Developer with 3+ years of experience in designing, developing, and implementing scalable backend solutions. Proven expertise in building real-time applications, secure authentication systems, Skilled in developing admin panels for streamlined application management and managing complex server-side logic. Adept at collaborating with cross-functional teams to deliver projects within deadlines.

## Experience

JULY 2023 – PRESENT

**Node.js Developer | Sofrik Services | Noida sec-63, UP**

- Developed and maintained RESTful APIs using Node.js and Express.js.
- Built real-time web applications using Socket.io.
- Implemented secure authentication using JWT tokens.
- Managed server-side operations using Nginx and FileZilla.
- Collaborated with cross-functional teams to deliver high-performance applications.

### Key Points:

- **8inNet:** Built a social media platform supporting mentions, hashtags, group chat, job postings, story creation, Create post, push notifications etc..
- **Scanzu:** Developed a QR code management application with subscription plans and lost item reporting many more.

NOV 2022 – JUNE 2023

**Node.js Developer | Maxtra Technologies | Noida sec-58, UP**

- Developed and maintained applications including e-commerce platforms, vendor management systems, and logistics solutions.
- Built and integrated scalable APIs for seamless performance.
- Designed and implemented admin panels for enhanced management and monitoring.
- Collaborated with stakeholders to ensure timely project delivery.

### Key Points:

- **MRSI:** Developed an event management platform for users to organize events, book sessions, and join them.

FEB 2022 – OCT 2022

**Node.js Developer | Riser Techub | Pune, Maharashtra**

- Worked on multiple projects, including Tradehorn (Blockchain-based Crypto wallet) and Fpbulls (Blockchain-based-Crypto wallet)

- Built APIs for Socket.io (Chat App), Authentication, JWT, Web3 Technology, Infura, IPFS, Moralis etc.
- **TradeHorn:** Created a secure cryptocurrency wallet application supporting major cryptocurrencies using Web3, blockchain technology and React.js.

## Skills

- **Programming Languages:** JavaScript, Typescript, Python, C, C++, HTML, CSS, MYSQL, MongoDB,
- **Frameworks & Technologies:** Node.js, Express.js, Blockchain, Nest.js, Django, React.js, MERN Stack, Web3, Sequelize ORM, Mongoose, Socket.io
- **Development Tools:** Visual Studio Code, Postman, CodeBlock, GitHub, Turbo C++.
- **Other Tools:** Nginx, FileZilla, PuTTY, WordPress, SEO
- **Soft Skills:** Problem-solving, Leadership, Multitasking, Time Management

## Education

2021 - 2023

**Master of Computer Application (MCA) | Maharshi Dayanand University | Haryana**

2018 - 2021

**Bachelor of Computer Application (BCA) | Maharshi Dayanand University | Haryana**

2017 - 2018

**12<sup>TH</sup> (PCB) | Govt. Boys Senior Secondary School | Delhi**
